Author: Nekisa Mahzad

I have been a student at California State University Channel Islands (CI) for 5 semesters, and over the course of my stay I have grown and learned more than I thought possible. I came to this school from Moorpark Community College already knowing that I wanted to be an English teacher; I had taken numerous English courses and though I knew exactly what I was headed for-was I ever wrong. Going through the English program has taught me so much more than stuff about literature and language, it has taught me how to be me. I have learned here how to write and express myself, how to think for myself, and how to find the answers to the things that I don't know. Most importantly I have learned how important literature and language are.

When I started at CI, I thought I was going to spend the next 3 years reading classics, discussing them and then writing about them. That was what I did in community college English courses, so I didn't think it would be much different here. On the surface, to an outsider, I am sure that this is what it appears that C.I. English majors do. In most all my classes I did read, discuss, and write papers; however, I quickly found out that that there was so much more to it. One specific experience I had while at C.I. really shows how integrated this learning is. Instead of writing a paper for my final project in Perspectives of Multicultural Literature (ENGL 449), I decided with a friend to venture to an Indian reservation and compare it to a book we read by Sherman Alexie. We had a great time and we learned so much more that we ever could have done from writing a paper. The opportunity to do that showed me that there are so many ways that one can learn that are both fun and educational.

The English courses also taught me how powerful the written word and language can be. Words tell so much more than a story. Stories tell about life and the human condition, they bring up the past and people and cultures that are long gone. Literature teaches about the self and the world surrounding the self. From these classes I learned about the world, its people and its history; through literature I learned how we as humans are all related. By writing about what we learn and/or what we believe, we are learning how to express ourselves.

I know that my ability to write and express my ideas, thoughts and knowledge has grown stronger each semester. I have always struggled to put my thoughts on paper in a manner that is coherent and correct according to assignments. I can remember being told numerous times in community college to "organize your

The Humble Essay Roy K. Humble, 2023-04-01 The Humble Essay is so much more than a writing textbook It gives you tools tips and tricks that actually explain what a writer does It doesn't sugarcoat the process or dumb down the very real challenges that entering a college writing space requires This book is more like a friend It's the kind of friend that will coach you through a tough time and encourage you and it will make you laugh while you go through it It's the kind of friend who holds your hair back when you're sick of writing and gives you the courage to try again Roy K Humble is the kind of writing teacher who understands the struggle of learning how to write like a college student and doesn't just tell you what you want to hear His lessons here are profound but in the sense that they are delivered by someone who wants you to feel included in the conversation about what good college writing should be He writes to students in language they can understand without becoming English majors and with just enough humor to keep them reading He writes for faculty moving step by step through the unadorned guiding principles of effective formal writing so that faculty have a great framework on which to build their classes Perhaps most importantly Humble understands that the price of a book matters to students so his books are affordable From every perspective Humble gets it The Humble Essay has students covered on these important topics Understanding the college essay as an idea Grasping the stages of the writing process Organizing the college essay around cohesive paragraphs Thinking for yourself as a college student Gathering and synthesizing sources and information Guiding readers through a thoughtful college essay

Readings in Writing Courses Richard C. Raymond,2010-12-01 As the title suggests this six chapter book responds to a question which in Western culture goes back to Plato Aristotle Cicero and Quintilian namely What should rhetoric teachers ask their students to read Primarily historical the first two chapters trace conflicting answers to the question above focusing on two constructive results of the debate the re invention of rhetoric and writing as a discipline a coherent and growing body

of knowledge and as a result the emergence of independent departments of writing free from departments of English free therefore to develop their own curriculum and to manage their own budgets Additionally the second chapter examines two destructive consequences of this debate the ban of literature from writing courses where students might profitably study both and as a result the often painful departmental splits which not only separate former colleagues but also cramp the pedagogy of those trained to teach both writing and literature More than a survey of key publications this chapter encourages readers to honor the discipline of rhetoric but to make a place for literature on their composition syllabi The next four chapters provide pedagogical support for these chief claims that literature can and should be taught in writing courses and that such readings need not distract students from the primary text their own writing On the contrary these readings motivate serious writing when students feel invited into a conversation on issues that touch their lives These pedagogical chapters then move entering professionals from the theoretical debate to the application of theory therefore the book would serve well professors of courses in composition theory particularly those who enjoy teaching the conflicts and preparing their graduate students to design assignments and courses that apply theories of learning reading and composing

Reconstructing Response to Student Writing Dan Melzer, 2023-08-07 In *Reconstructing Response to Student Writing* Dan Melzer makes the argument that writing instructors should shift the construct so that peer response and student self-assessment are more central than teacher response. Presenting the results of a national study of teacher and peer response and student self-assessment at institutions of higher education across the United States, Melzer analyzes teacher and peer response to over 1 000 pieces of student writing as well as 128 student portfolio reflection essays. He draws on his analysis and on a comprehensive review of the literature on response to introduce a constructivist heuristic for response aimed at both composition instructors and instructors across disciplines. Melzer argues that teachers and researchers should focus less on teacher response to individual pieces of student writing and more on engaging in dialogue with student self-assessment and peer response focusing on growth and transfer rather than products and grades. *Reconstructing Response to Student Writing* especially when taken together with Melzer's previous book *Assignments across the Curriculum* provides a comprehensive and large-scale view of college writing and responding across the curriculum in the United States.

The End of Composition Studies David W. Smit, 2007-03-29 Setting forth an innovative new model for what it means to be a writing teacher in the era of writing across the curriculum, *The End of Composition Studies* urges a reconceptualization of graduate work in rhetoric and composition. Systematically critiques the limitations of current pedagogical practices at the postsecondary level and proposes a reorganization of all academic units. David W. Smit calls into question two major assumptions of the field: that writing is a universal ability and that college-level writing is foundational to advanced learning. Instead, Smit holds that writing involves a wide range of knowledge and skill that cannot be learned solely in writing classes but must be acquired by immersion in various discourse communities in and out of academic settings. *The End of Composition Studies* provides a compelling rhetoric and rationale for eliminating the field and reenvisioning the profession as truly interdisciplinary, a change that is necessary in order to fulfill the needs and demands of students, instructors, administrators, and our democratic society.

Teaching Business Ethics for Effective Learning Ronald R. Sims, 2002-05-30 The key to teaching business ethics successfully, says Sims, is to start with clear goals and a sensible expectation of outcomes and with a true knowledge and appreciation of how people actually learn. Seems obvious enough, he says, but the surprise is that so few understand this. Thus the teaching of business ethics is often an unproductive, frustrating exercise in futility. Sims hopes to change that. Proceeding with the conviction that open communications between teacher and student before, during, and after the teaching experience is vital, Sims identifies key teaching processes, gives practical advice on designing and planning the curriculum, and offers guidance on how to develop a climate conducive to effective learning. He highlights the importance of creating a classroom climate that encourages open dialogue, good moral conversation, and conversational learning. And

throughout he emphasizes that learning styles and experiential learning theory are cornerstones of teaching business ethics thus taking an approach unlike any in the literature An important guide for those who are new to teaching this essential subject Sims book will also be helpful for more experienced teachers who are wondering why their own methods do not always work or do not work as well as they believe they should Sims identifies important processes that must be managed if business ethics is to be taught and learned successfully processes such as creating stakeholder commitment to the goals purposes and outcomes of the teaching effort and curriculum design and planning that are attuned to individual differences in learning styles motivation and values Also included in Sims processes are the development of individual school outcomes and expectations and the assessment procedures that can measure them He discusses the importance of incorporating debriefing into an experiential learning exercise or discussion and goes on to give an in depth discussion of the pedagogical approaches that allow teachers to teach the practical and theoretical components of the subject simultaneously Well illustrated with examples such as an interdisciplinary approach to teaching and a way to institutionalize outcomes assessment by means of total quality management Sims book returns constantly to his major theme that to teach business ethics effectively the teacher must first create a climate of trust and sharing within and between students and between students and teacher and that the teacher must have a concrete way to measure the impact of the teaching effort s results
