**Spatial Modelling and Failure Analysis of Natural and Engineering Disasters through Data-Based Methods,volume III** Faming Huang,Jingjing Meng,Sansar Raj Meena,2024-09-12 This Research Topic is Volume III of a series The previous volume can be found here Spatial Modelling and Failure Analysis of Natural and Engineering Disasters through Data based Methods Volume II and Spatial Modelling and Failure Analysis of Natural and Engineering Disasters through Data based Methods Natural and engineering disasters which include landslides rock fall rainstorm dam failure floods earthquakes road and building disasters and wildfires appear as results of the progressive or extreme evolution of climatic tectonic and geomorphological processes and human engineering activities It is significant to explore the failure mechanism and carry out spatial modeling of these engineering and natural disasters due to their serious harm to the safety of people s lives and property The data based methods including advanced and successful remote sensing geographic information systems machine learning and numerical simulation techniques methods are promising tools to analyze these complex disasters Machine Learning models such as neurofuzzy logic decision tree artificial neural network deep learning and evolutionary algorithms are characterized by their abilities to produce knowledge and discover hidden and unknown patterns and trends from large databases whereas remote sensing and Geographic Information Systems appear as significant technology equipped with tools for data manipulation and advanced mathematical modeling What is more the numerical simulation can also be acknowledged as advanced technologies for discovering hidden failure mechanism of disasters The main objective of this Research Topic is to provide a scientific forum for advancing the successful implementation of Machine Learning ML and numerical simulation techniques in operation rules failure mechanism spatial and time series prediction susceptibility mapping hazard assessment vulnerability modeling risk assessment and early warning of complex natural and engineering disasters

**Low Carbon Stabilization and Solidification of Hazardous Wastes** Daniel C.W. Tsang,Lei Wang,2021-09-24 Low Carbon Stabilization and Solidification of Hazardous Wastes details sustainable and low carbon treatments for addressing environmental pollution problems critically reviewing low carbon stabilization solidification technologies This book presents the latest state of the art knowledge of low carbon stabilization solidification technologies to provide cost effective sustainable solutions for real life environmental problems related to hazardous wastes including contaminated sediments As stabilization solidification is one of the most widely used waste remediation methods for its versatility fast implementation and final treatment of hazardous waste treatment it is imperative that those working in this field follow the most recent developments Low Carbon Stabilization and Solidification of

Hazardous Wastes is a necessary read for academics postgraduates researchers and engineers in the field of environmental science and engineering waste management and soil science who need to keep up to date with the most recent advances in low carbon technologies This audience will develop a better understanding of these low carbon mechanisms and advanced characterization technologies fostering the future development of low carbon technologies and the actualization of green and sustainable remediation Focuses on stabilization solidification for environmental remediation as one of the most widely used environmental remediation technologies in field scale applications Details the most advanced and up to date low carbon sustainable technologies necessary to guide future research and sustainable development Provides comprehensive coverage of low carbon solutions for treating a variety of hazardous wastes as well as contaminated soil and sediment
