### The Endangered Otter

Marine otter species are being lost at a rate that is unprecedented in the history of the United States and worldwide. In 1970, it was estimated that 100,000 otters lived in the United States and 100,000 more lived in other parts of the world.

Of course, the loss of otters is not the only problem. The loss of otters is also a problem for the marine environment. Otters are important in the marine food chain. They eat a variety of marine life, including fish, shellfish, and seaweed. They also help to keep the water clean by eating the waste of other animals.

It is not just the loss of otters that is a problem. The otters are also being lost. In 1970, there were about 100,000 otters in the United States. Today, there are only about 10,000 left.

There are many reasons why otters are being lost. One reason is that they are being caught and killed for their fur. Another reason is that they are being caught and killed for their meat. A third reason is that they are being caught and killed for their bones. A fourth reason is that they are being caught and killed for their skin.

There are also many reasons why otters are being lost. One reason is that they are being caught and killed for their fur. Another reason is that they are being caught and killed for their meat. A third reason is that they are being caught and killed for their bones. A fourth reason is that they are being caught and killed for their skin.

There are also many reasons why otters are being lost. One reason is that they are being caught and killed for their fur. Another reason is that they are being caught and killed for their meat. A third reason is that they are being caught and killed for their bones. A fourth reason is that they are being caught and killed for their skin.

Because the otter was classified as being "endangered," it is now illegal to catch or kill otters. However, many people are still catching and killing otters. This is because many people do not know that it is illegal to catch or kill otters. This is also because many people do not care about the otters.

1. How have otters been lost? (Paragraph 1)

One way otters have been lost is by being caught and killed for their fur. Another way is by being caught and killed for their meat. A third way is by being caught and killed for their bones. A fourth way is by being caught and killed for their skin.

2. How have otters been lost? (Paragraph 2)

Another way otters have been lost is by being caught and killed for their fur. Another way is by being caught and killed for their meat. A third way is by being caught and killed for their bones. A fourth way is by being caught and killed for their skin.

3. How have otters been lost? (Paragraph 3)

Another way otters have been lost is by being caught and killed for their fur. Another way is by being caught and killed for their meat. A third way is by being caught and killed for their bones. A fourth way is by being caught and killed for their skin.
