Wheeler,Louis A.J.M. de Visser,Julie Kuehnel,Timothy Kuehnel,2013-11-21 In the treatment of marital problems behaviorally oriented and communication oriented approaches have been in conflict and seen as contrasting and unlikely bed partners Many therapists

focusing on communication skills have felt that behaviorists were too structured and uncaring on the other hand behaviorists have considered humanistic therapists as being touchy feely vague and unfocused However in the Handbook of Marital Therapy Liberman Wheeler de Visser and the Kuehnels have wedded these two potent approaches into an integrated framework that makes them loving bed partners With over a decade of experience in applying behaviorally oriented treatment to couples Liberman and his co authors have developed an educational model that focuses on teaching specific communication skills to couples The communication skills they describe have been used extensively in all types of marital therapy regardless of the therapist's theoretical orientation The unique contribution of this book is that the authors provide a step by step approach to teaching these communication skills within a behavioral framework Each chapter guides the therapist through the many issues and problems confronting him or her as a change agent This highly readable book is enhanced by a liberal use of case examples Emphasis is given to homework and structured sessions that focus on increasing specific communication skills in a sequential manner The advantages of working with couples in a group setting are discussed and concrete suggestions on how to manage these groups are clearly presented
