## ITIL® Release, Control & Validation

### Course Description:

ITIL is comprised of five core publications: Service Strategy, Service Design, Service Transition, Service Operations and Continual Service Improvement, promoting alignment with the business as well as improving operational efficiency. The official ITIL® qualification scheme describes two streams, the Service Lifecycle Stream and the Service Capability stream.

The Service Lifecycle stream focuses on ITIL practices within the Service Lifecycle context. The prime focus is the Lifecycle itself as well as the process and practice elements used within it.

The Service Capability stream is for those who wish to obtain an in-depth understanding of ITIL processes and roles. Attention to the Service Lifecycle is illustrated as part of the curriculum but the primary focus is the on the process activities, execution and use throughout the Service Lifecycle.

The ITIL® RCV (Release, Control & Validation) course is part of the ITIL® Intermediate Capability certification stream. The course prepares candidates to take the ITIL® Release, Control & Validation Intermediate exam as well as providing valuable knowledge that can be implemented in the workplace.

### Course and Learning Objectives:

At the end of this course, you will learn:

- The concept of Service Management as a practice
- The purpose, goal and objectives of the Change Management Process
- The purpose of the SACM process and the goal of Configuration Management
- The use of a Configuration Management System (CMS), and its major components, in supporting the effective execution of SACM process
- The purpose, goal, objectives and scope of the RDM process
- The purpose, goal and objectives of the SVT process
- The purpose, goal, objectives and scope of the KM process
- The purpose, goal, objectives and scope of the Service Evaluation process
- The purpose and scope of the Request Fulfilment process

### Course Approach:

Participants will learn the principles and core elements of the Service Capability approach to IT Service Management as well as focusing on the processes & roles, activities and their execution throughout the Service Lifecycle. An interactive approach is used combining lecture, discussion and case study experience to prepare participants for the ITIL Intermediate Release, Control & Validation certification exam as well as providing valuable practical knowledge that can be rapidly applied in the workplace. Quint Wellington Redwood's integrated case study deepens the participant's appreciation of how ITIL best practices can be applied in order to improve IT performance. Practical assignments are used throughout the course to enhance the learning experience.

## **Release Control And Validation Book By Derecho Internacional:**

*The Inter American Court of Human Rights* Natalia Zúñiga, 2022-07-05 This book provides a critical legal perspective on the legitimacy of international courts and tribunals The volume offers a critique of ideology of two legal approaches to the legitimacy of the Inter American Court of Human Rights IACtHR that portray it as a supranational tribunal whose last say on human rights protection has a transformative effect on the democracies of Latin America The book shows how the discussion between these Latin American legal strands mirrors global trends in the study of the legitimacy of international courts related to the use of constitutional analogies and concepts such as the notion of judicial dialogue and the idea of democratic transformation It also provides an in depth analysis of how through the use of those categories legal experts studying the legitimacy of the IACtHR enact self validation processes by making themselves the principal agents of transformation These self validation processes work as ideological apparatuses that reproduce and entrench the mindset that the legal discipline is a driving force of change in itself Further the book shows how profiling the Court as an agent of transformation diverts attention from the ways in which it has pursued a particular view of human rights and democracy in the region that creates and reproduces relations of inequality and domination Rather than discarding the IACtHR this book aims to de centre the focus away from formal legal institutions engaging with the idea that ordinary people can mobilise and define the content of law to transform their lives and territories The book will be a valuable resource for scholars working in the areas of human rights law law public international law legal theory constitutional law political science and legal philosophy

*The Animal Experimentation Debate* David E. Newton, 2013-05-09 Reviewing the topic from antiquity to the present day this book examines the debate over the use of animals in research in a fair and balanced way The debate over the use of nonhuman animals in experimental research has gone on for centuries and it continues as vigorously today as it ever has In fact in the last decade the controversy has intensified making animal testing a topic at the highest level of debate of any socioscientific issue in the United States This book presents all sides of the issue so that readers can come to their own conclusions as to the morality and validity of animal experimentation and provides biographies of individuals and descriptions of organizations that have been involved in the debate over the centuries Additionally it documents the historical shift in thinking that made animal experimentation commonplace between the time of the ancient Greeks and the 19th century to the mindset of some who argue for an end to the practice and alternative ways of conducting medical experimentation to benefit human health
