Machine Scoring of Student Essays Patricia Freitag Ericsson,Richard Haswell,2006-03-15 The current trend toward machine scoring of student work Ericsson and Haswell argue has created an emerging issue with implications for higher education across the disciplines but with particular importance for those in English departments and in administration The academic community has been silent on the issue some would say excluded from it while the commercial entities who develop essay scoring software have been very active Machine Scoring of Student Essays is the first volume to seriously consider the educational mechanisms and consequences of this trend and it offers important discussions from some of the leading scholars in writing assessment Reading and evaluating student writing is a time consuming process yet it is a vital part of both student placement and coursework at post secondary institutions In recent years commercial computer evaluation programs have been developed to score student essays in both of these contexts Two year colleges have been especially drawn to these programs but four year institutions are moving to them as well because of the cost savings they promise Unfortunately to a

large extent the programs have been written and institutions are installing them without attention to their instructional validity or adequacy. Since the education software companies are moving so rapidly into what they perceive as a promising new market, a wider discussion of machine scoring is vital if scholars hope to influence development and/or implementation of the programs being created. What is needed then is a critical resource to help teachers and administrators evaluate programs they might be considering and to more fully envision the instructional consequences of adopting them. And this is the resource that Ericsson and Haswell are providing here.

[How Students Write: A Linguistic Analysis](#). Laura Louise Aull, 2020-04-01. Broad generalizations about people today are a familiar feature of first-year student writing. How Students Write brings a fresh perspective to this perennial observation using corpus linguistics techniques. This study analyzes sentence-level patterns in student writing to develop an understanding of how students present evidence, draw connections between ideas, relate to their readers, and ultimately learn to construct knowledge in their writing. Drawing on both first-year and upper-level student writing, the book examines the

discourse of students at different points in their education It also distinguishes between argumentative and analytic essays to explore the way school genres and assignments shape students choices In focusing on sentence level features such as hedges perhaps and boosters definitely this study shows how such rhetorical choices work together to open or close opportunities for thoughtful exchanges of ideas Attention to these features can help instructors foster civil discourse design effective assignments and expose and question norms of higher education **English Journal** ,2002
