Interdisciplinary Approaches to Pedagogy and Place-Based Education Deric Shannon, Jeffery Galle, 2017-06-05 This book brings together scholars from a wide range of disciplines to creatively engage with place in the context of pedagogy. Beginning with an exploration of traditional place-based forms of education such as outdoor education, travel courses, and courses on sustainability, the authors go on to expand our popular notions of place, including the classroom, the campus, our

interior selves and our digital ecosystems This reconsideration of place based education represents not only an engagement of prior literature on pedagogy and place but also a re imagining of the role that place might play in education Authors stretch the notion of place arguing for a holistic approach to disciplines in the humanities social sciences and natural sciences bringing into focus an array of contentious issues in philosophies and methods of teaching for multiple academic disciplines and their many intersections

Recent Advances and Future Directions in Causality, Prediction, and Specification Analysis Xiaohong Chen,Norman R. Swanson,2012-08-01 This book is a collection of articles that present the most recent cutting edge results on specification and estimation of economic models written by a number of the world s foremost leaders in the fields of theoretical and methodological econometrics Recent advances in asymptotic approximation theory including the use of higher order asymptotics for things like estimator bias correction and the use of

various expansion and other theoretical tools for the development of bootstrap techniques designed for implementation when carrying out inference are at the forefront of theoretical development in the field of econometrics One important feature of these advances in the theory of econometrics is that they are being seamlessly and almost immediately incorporated into the empirical toolbox that applied practitioners use when actually constructing models using data for the purposes of both prediction and policy analysis and the more theoretically targeted chapters in the book will discuss these developments Turning now to empirical methodology chapters on prediction methodology will focus on macroeconomic and financial applications such as the construction of diffusion index models for forecasting with very large numbers of variables and the construction of data samples that result in optimal predictive accuracy tests when comparing alternative prediction models Chapters carefully outline how applied practitioners can correctly implement the latest theoretical refinements in model specification in order to build the best models using large scale and traditional datasets making the book of interest to a broad readership of economists from theoretical econometricians to applied economic practitioners
