Seeing Red Nicholas Humphrey, 2009-06-30 A brilliantly inventive account of the evolution of consciousness the best yet Paul Broks Prospect Consciousness matters Arguably it matters more than anything The purpose of this book is to build towards an explanation of just what the matter is Nicholas Humphrey begins this compelling exploration of the biggest of big questions with a challenge to the reader and himself What s involved in seeing red What is it like for us to see someone else seeing something red Seeing a red screen tells us a fact about something in the world But it also creates a new fact a sensation in each of our minds the feeling of redness And that s the mystery Conventional science so far hasn t told us what conscious sensations are made of or how we get access to them or why we have them at all From an evolutionary perspective what s the point of consciousness Humphrey offers a daring and novel solution arguing that sensations are not things that happen to us they are things we do originating in our primordial ancestors expressions of liking or disgust Tracing the evolutionary trajectory through to human beings he shows how this has led to sensations playing the key role in the human sense of Self The Self as we now know it from within seems to have fascinating other worldly properties It leads us to believe in mind body duality and the existence of a soul And such beliefs even if mistaken can be highly adaptive because they increase the value we place on our own and others lives Consciousness matters Humphrey concludes with striking paradox because it is its function to matter It has been designed to create in human beings a Self whose life is worth pursuing Praise for Seeing Red A wonderful amalgam of science philosophy and art Seeing Red is based on deep knowledge of visual processing by the brain and poetic understanding of human experience This is a remarkable achievement Richard Gregory Emeritus Professor of Neuropsychology University of Bristol and editor of The Oxford Companion to the Mind A brief brilliant and wonderfully lucid contribution to consciousness studies By combining empirical scientific method evolutionary theory and a sensitive appreciation of the arts Nicholas Humphrey argues plausibly that the hard problem of consciousness the difficulty of explaining the connection between the material brain and the phenomenon of individual selfhood may itself be the answer to a bigger question what makes us human David Lodge author of Consciousness and the Novel Connected Essays Illustrating his argument with the musings of poets and painters Humphrey stylishly
