Public Health Service, 1917 Phantom Billing, Fake Prescriptions, and the High Cost of Medicine Terry L. Leap, 2011-04-15 U S health care is a 2.5 trillion system that accounts for more than 17 percent of the nation's GDP It is also highly susceptible to fraud Estimates vary but some observers believe that as much as 10 percent of all medical billing involves some type of fraud In 2009 New York's Medicaid fraud office recovered 283 million and obtained 148 criminal convictions In July 2010 the U S Justice Department charged nearly 100 patients doctors and health care executives in five states of bilking the Medicare system out of more than 251 million through false claims for services that were medically unnecessary or never provided These cases only hint at the scope of the problem In Phantom Billing Fake Prescriptions and the High Cost of Medicine Terry L. Leap takes on medical fraud and its economic psychological and social costs Illustrated throughout with dozens of specific and often fascinating cases this book covers a wide variety of crimes kickbacks illicit referrals overcharging and double billing upcoding unbundling rent a patient and pill mill schemes insurance scams short pilling off label marketing of pharmaceuticals and rebate fraud as well as criminal acts that enable this fraud mail and wire fraud conspiracy and money laundering After assessing the effectiveness of the federal laws designed to fight health care fraud and abuse the antikickback statute the Stark Law the False Claims Act HIPAA and the food and drug laws Leap suggests a number of ways that health care providers consumers insurers and federal and state officials can bring health care fraud and abuse under control thereby reducing the overall cost of medical care in America Drugs, Crime, and Justice Larry K. Gaines, Janine Kremling, 2013-12-11 The twenty six articles in this edited volume provide perspective on the interrelated issues surrounding the use of drugs in society Although drugs have long been a social problem the importance of the issue and the involvement of the criminal justice system have varied across time Public concern has typically centered on

illegal drugs but the drug issue today is even more complex given the impact of prescription drugs Exaggeration has been a constant theme in the history of public policy on drugs usually playing on public fear to demonize specific drugs and users Some drugs are more dangerous than others The variations in effects impact enforcement prevention and treatment If we are going to criminalize drugs and drug usage policies and penalties should be based on the relative dangerousness of a drug or class of drugs Policies can reduce harm create harm or both Our current drug policies attempt to reduce harm through law enforcement We arrest anyone involved in drug activities under the premise of protecting society These same policies however result in the incarceration of large numbers of people they are expensive they overburden the criminal justice system and they have lasting consequences for those caught up in the drug war no matter how minor their offenses Drug policies should be weighed carefully implementing those that result in the least amount of harm to society The editors have collected timely articles that provide perspective and a foundation for an informed approach to addressing problems associated with drug use
