Requirements Engineering For Digital Health:

Requirements Engineering for Digital Health Samuel A. Fricker, Christoph Thümmel, Anastasios Gavras, 2014-11-14 Healthcare and well being have captured the attention of established software companies start ups and investors Software is starting to play a central role for addressing the problems of the aging society and the escalating cost of healthcare services Enablers of such digital health are a growing number of sensors for sensing the human body and communication infrastructure for remote meetings data sharing and messaging The challenge that lies in front of us is how to effectively make use of these capabilities for example to empower patients and to free the scarce resources of medical personnel Requirements engineering is the process by which the capabilities of a software product are aligned with stakeholder needs and a shared understanding between the stakeholders and development team established This book provides guide for what to look for and do when inquiring and specifying software that targets healthcare and well being helping readers avoid the pitfalls of the highly regulated and sensible healthcare domain are and how they can be overcome This book brings together the knowledge of 22 researchers engineers lawyers and CEOs that have experience in the development of digital health solutions It represents a unique line up of best practices and recommendations of how to engineer requirements for digital health In particular the book presents The area of digital health e health and m health Best practice for requirements engineering based on evidence from a large number of projects Practical step by step guidelines examples and lessons learned for working with laws regulations ethical issues interoperability user experience security and privacy How to put these many concerns together for engineering the requirements of a digital health solution and for scaling a digital health product For anybody who intends to develop software for digital health this book is an introduction and reference with a wealth of actionable insights For students interested in understanding how to apply software to healthcare the text introduces key topics and guides further studies with references to important literature

Requirements Engineering: Foundation for Software Quality Samuel A. Fricker, Kurt Schneider, 2015-03-13 This book constitutes the refereed proceedings of the 20th International Working Conference on Requirements Engineering Foundation for Software Quality REFSQ 2014 held in Essen Germany in April 2013 The 23 papers presented together with 1 keynote were carefully reviewed and selected from 62 submissions The REFSQ 15 conference is organized as a three day symposium The REFSQ 15 has chosen a special conference theme I heard it first at RefsQ Two conference days were devoted to presentation and discussion of scientific papers The two days connect to the conference theme with a keynote an invited talk and poster presentations There were two parallel tracks on the third day the Industry Track and the new Research Methodology Track REFSQ 2015 seeks reports of novel ideas and techniques that enhance the quality of RE s products and processes as well as reflections on current research and industrial RE practices

Digital Human Modeling. Applications in Health, Safety, Ergonomics, and Risk Management: Health and Safety Vincent G. Duffy, 2017-06-28 The two volume set LNCS 10286 10287

constitutes the refereed proceedings of the 8th International Conference on Digital Human Modeling and Applications in Health Safety Ergonomics and Risk Management DHM 2017 held as part of HCI International 2017 in Vancouver BC Canada HCII 2017 received a total of 4340 submissions of which 1228 papers were accepted for publication after a careful reviewing process The 75 papers presented in these volumes were organized in topical sections as follows Part I anthropometry ergonomics design and comfort human body and motion modelling smart human centered service system design and human robot interaction Part II clinical and health information systems health and aging health data analytics and visualization and design for safety

Digital Health for Primary Care Ana Luisa Neves, Lilliana Laranjo, 2025-08-29 This book provides a comprehensive exploration of the role of Digital Health technologies in Primary Care Discussing the transformative potential of Digital Health solutions and their impact on healthcare delivery within the Primary Care setting the book offers insights considers strategies and shares practical guidance for all Primary Care providers interested in leveraging digital innovations to enhance patient outcomes and optimise care delivery Key Features Content specific to and tailored for primary care and family medicine Provides expert opinion and thought leadership on key enablers and hindrances of digital technology within health care systems Includes concepts of patient and provider co design of ideal systems and real world examples of successful integrations of technologies into patient centred models of care Delivers the essential knowledge for practitioners and policy makers to develop and implement digital health innovation and service redesign Through structured description of the spectrum of existing digital innovations all applicable within and relevant to Primary Care this timely new guide will support clinicians innovators and policy makers to maximise the opportunities and challenges that these technologies present This guide will also enable future doctors whatever their career aspirations to understand the importance of digital innovation and its applications in health systems and patient centred care About the Editors Ana Luisa Neves MD PhD Clinical Senior Lecturer in Digital Health Department of Primary Care and Public Health Imperial College London UK Chair of the WONCA Working Party on eHealth Lilliana Laranjo MD MPH PhD Associate Professor Westmead Applied Research Centre Sydney Medical School Faculty of Medicine and Health University of Sydney Australia Deputy Chair of the WONCA Working Party on eHealth

Lightner, Redha Taiar, 2021-07-07 This book is concerned with human factors and ergonomics research and developments in the design and use of systems and devices for effective and safe healthcare delivery It reports on approaches for improving healthcare devices so that they better fit to people s including special population s needs It also covers assistive devices aimed at reducing occupational risks of health professionals as well as innovative strategies for error reduction and more effective training and education methods for healthcare workers and professionals Equal emphasis is given to digital technologies and to physical cognitive and organizational aspects which are considered in an integrated manner so as to facilitate a systemic approach for improving the quality and safety of healthcare service The book also includes a special section dedicated to innovative strategies for assisting caregivers patients and people s needs during pandemic Based on papers presented at the AHFE 2021 Conference on Human Factors and Ergonomics in Healthcare and Medical Devices held virtually on 25-29 July 2021 from USA the book offers a timely reference guide to both researchers and healthcare professionals involved in the design of medical systems and managing healthcare settings as well as to healthcare counselors and global health organizations **Digital Disruption in Healthcare** Nilmini Wickramasinghe, Suresh Chalasani, Elliot Sloane, 2022-06-23 Digital disruption in

healthcare is generating new technologies applications and large data sets and these are all precipitating significant changes in healthcare processes Emerging applications due to digital disruption and their impact on healthcare delivery and quality are becoming some of the key focus areas of research However to date systematic generalizable full scale evaluation of these new technologies applications is lacking Little is known about the net short or long term health and wellness impacts of digital technologies Similarly the care delivery and management process changes caused by digital disruption are forcing healthcare organizations to react rather than plan for them in advance Given these gaps this book addresses the technology applications data and process aspects of digital disruption in healthcare This volume is a collection of key areas in health and wellness impacted by digital disruption It highlights the benefits barriers facilitators and transformative forces that are shaping healthcare digital disruption Topics explored in the chapters include Towards Network Medicine Implementation of Panomics and Artificial Intelligence for Precision Medicine Telehealth Implementation A Synopsis of Patients Experience of Clinical Outcomes Realising the Healthcare Value Proposition of Better Access Quality and Value of Care by Incorporating the Social Determinants of Health with Digital Health The Internet Hospital in the Time of COVID 19 An Example from China Given the diverse interest in healthcare delivery solutions today the need is broad across academia and the healthcare industry for a comprehensive resource for teaching practice and research Digital Disruption in Healthcare is a point of entry resource for transferring theory into practice for heads of IT departments in hospitals consultants and academia as well as scholars and researchers Both graduate and undergraduate students as well as certificate seeking health informatics and public health students would benefit from this book Furthermore it is useful for healthcare stakeholders including healthcare professionals clinicians medical administrators managers consultants policy makers and IT practitioners within the healthcare space Human-Centered Software Engineering Regina Bernhaupt,Carmelo Ardito,Stefan Sauer,2020-11-25

This book constitutes the refereed conference proceedings of the 8th IFIP WG 13.2 International Conference on Human Centered Software Engineering HCSE 2020 which was supposed to be held in Eindhoven The Netherlands in November December 2020 was instead held virtually due to the COVID 19 pandemic The 10 full papers and 5 short poster and demo papers presented together with 5 poster and demo papers were carefully reviewed and selected from 33 submissions The papers focus on the interdependencies between user interface properties and contribute to the development of theories methods tools and approaches for dealing with multiple properties that should be taken into account when developing interactive systems They are organized in the following topical sections user centred design approaches model based and model driven approaches software development strategies and posters and demos **Improving Usability, Safety and Patient Outcomes with Health Information Technology** John A. Bartle-Clar,Gerry Bliss,Elizabeth M. Borycki,Karen L. Courtney,Alex Mu-Hsing Kuo,Andre Kushniruk,2019-03-15 Information technology is revolutionizing healthcare and the uptake of health information technologies is rising but scientific research and industrial and governmental support will be

needed if these technologies are to be implemented effectively to build capacity at regional national and global levels This book **Improving Usability Safety and Patient Outcomes with Health Information Technology** presents papers from the Information Technology and Communications in Health conference ITCH 2019 held in Victoria Canada from 14 to 17 February 2019 The conference takes a multi perspective view of what is needed to move technology forward to sustained and widespread use by transitioning research findings and approaches into practice Topics range from improvements in usability and training and the need for new and improved designs for information systems user interfaces and interoperable solutions to governmental policy mandates initiatives and the need for regulation The knowledge and insights gained from the ITCH 2019 conference will surely stimulate fruitful discussions and collaboration to bridge research and practice and improve usability safety and patient outcomes and the book will be of interest to all those associated with the development implementation and delivery of health IT solutions

Requirements in Engineering Projects João M. Fernandes,Ricardo J. Machado,2015-07-18 This book focuses on various topics related to engineering and management of requirements in particular elicitation negotiation prioritisation and documentation whether with natural languages or with graphical models The book provides methods and techniques that help to characterise in a systematic manner the requirements of the intended engineering system It was written with the goal of being adopted as the main text for courses on requirements engineering or as a strong reference to the topics of requirements in courses with a broader scope It can also be used in vocational courses for professionals interested in the software and information systems domain Readers who have finished this book will be able to establish and plan a requirements engineering process within the development of complex engineering systems define and identify the types of relevant requirements in engineering projects choose and apply the most appropriate techniques to elicit the requirements of a given system conduct and manage negotiation and prioritisation processes for the requirements of a given engineering system document the requirements of the system under development either in natural language or with graphical and formal models Each chapter includes a set of exercises

IoT in Healthcare and Ambient Assisted Living Gonçalo Marques,Akash Kumar Bhoi,Victor Hugo C. de Albuquerque,Hareesha K.S.,2021-01-04 This book presents the state of the art of Internet of Things IoT from the perspective of healthcare and Ambient Assisted Living AAL It discusses the emerging technologies in healthcare services used for healthcare professionals and patients for enhanced living environments and public health The topics covered in this book include emerging eHealth IoT applications Internet of Medical Things health sensors and wearable sensors for pervasive and personalized healthcare and smart homes applications for enhanced health and well being The book also presents various ideas for the design and development of IoT solutions for healthcare and AAL It will be useful for bioengineers and professionals working in the areas of healthcare as well as health informatics

The Role of Digital Health Policy and Leadership Alireza Khatami,2024-03-15 Digital health technologies could change the trajectory of current healthcare systems and make them more proactive

Advanced predictive technologies have now become available which make this more possible than ever before but it will not happen without improved policies regulations and governance of our systems Health informatics must operate at the macro level if it is to provide policymakers and other stakeholders with the information they need to better allocate resources and intervene more effectively This book presents the proceedings of FHLIP the Future of Health Leadership Informatics and Policy Conference held on 22 February 2024 in Toronto Canada The conference aimed to catalyze the development of proactive innovative digital health solutions capable of addressing the ever evolving challenges faced by the healthcare sector and lay the groundwork for a more resilient patient centered healthcare ecosystem It provided a platform for stakeholders to identify challenges question assumptions and better understand the roles of policymakers and vendors The conference received a total of 26 submissions of which 19 were selected for presentation at the conference and publication here after a thorough review process Topics covered included interoperability and governance regulation of electronic medical records addressing the needs of vulnerable populations scaling up use of artificial intelligence and the design of health system level architectures for large scale interventions The book looks forward to a future where digital health makes contributions beyond the provider and patient level and will be of great interest to not only those working in the field of health informatics and digital health but also to digital leaders and policy makers interested in taking their healthcare systems From Reactive to Proactive

How COVID-19 is Accelerating the Digital Revolution R. Anandan,G.

Suseendran,Pushpita Chatterjee,Noor Zaman Jhanjhi,Uttam Ghosh,2022-05-18 This book explores how digital technologies have proved to be a useful and necessary tool to help ensure that local and regional governments on the frontline of the emergency can continue to provide essential public services during the COVID 19 crisis Indeed as the demand for digital technologies grows local and regional governments are increasingly committed to improving the lives of their citizens under the principles of privacy freedom of expression and democracy The Digital Revolution began between the late 1950s and 1970s and represents the evolution of technology from the mechanical and analog to the digital The advent of digital technology has also changed how humans communicate today using computers smartphones and the internet Further the digital revolution has made a tremendous wealth of information accessible to virtually everyone In turn the book focuses on key challenges for local and regional governments concerning digital technologies during this crisis e g the balance between privacy and security the digital divide and accessibility Privacy is a challenge in the mitigation of COVID 19 as governments rely on digital technologies like contact tracking apps and big data to help trace peoples patterns and movements While these methods are controversial and may infringe on rights to privacy they also appear to be effective measures for rapidly controlling and limiting the spread of the virus Next the book discusses the 10 technology trends that can help build a resilient society as well as their effects on how we do business how we work how we produce goods how we learn how we seek medical services and how we entertain ourselves Lastly the book addresses a range of diversified technologies e g
