

BRAVER NEW WORLD ORDER

Review/Essay inspired by “Brave New World” (1932) by Aldous Huxley

© H. J. Spencer [12Aug.2020] 5,000 words (8 pages)

ABSTRACT

This was Huxley's fifth novel but his first dystopian science fiction attempt. The story is set in a future fictitious One World State, whose citizens are environmentally engineered into an intelligence-based social hierarchy based on advanced technology in reproduction, sleep-learning with psychological manipulation through classical conditioning. The essay component here views this novel as an allegory of today's world being panicked into a radical 'Restart' into a promised utopia by the New World Order. Huxley was keenly aware of the distinction between science and technology and it is the misuse of new scientific knowledge in the form of dangerous technology that he was alerting us, especially in the hands of an all powerful technocratic state that knew how to manipulate its citizens through psychology rather than brute terror, as Orwell portrayed in the other famous dystopian novel, *1984*. This review checks Huxley's predictions; the essay concludes with the reviewer's comparable predictions for 2032.

AUTHOR'S BIOGRAPHY

Aldous Huxley (26 July 1894 - 22 Nov. 1963) was an English writer and philosopher, who authored nearly 50 books (novels and non-fiction, plus essays and poems). He was born into the prominent Huxley family; his grandfather was the zoologist and comparative anatomist, Thomas Henry Huxley, (1825-1895) who became notorious as "Darwin's Bulldog". Aldous had two famous brothers, Julian and Andrew, who both became outstanding biologists. He was taught by his mother at her Hillside School until 1908 when she became terminally ill and died (his father later remarried). Aldous transferred to Eton College; he became half-blind in 1911 but recovered within 8 years. He entered Balliol College, Oxford in 1913 to study English Literature, graduating in 1916 with a BA (First Class Honours). He then taught French poorly at Eton (Orwell was his pupil). During the 1920s, he worked in an advanced chemical plant in northeast England - an experience that later influenced this world famous novel. Aldous married Maria Nys (a Belgian lady) in 1919; they had one child, Matthew in 1920; he had a career as an author, anthropologist and epidemiologist, dying in 2005. Maria died of cancer in 1955. Aldous lived in Italy and France but sensing a new war coming, moved to Los Angeles in 1937. He died from laryngeal cancer, assisted by an LSD injection. In 1956, Huxley married Laura Archera (1911-2007), also an author, as well as a violinist and psychotherapist. She wrote *This Timeless Moment*, a biography of Huxley. By the end of his life, Aldous Huxley was widely acknowledged as one of the foremost intellectuals of his time. He was nominated **seven** times for the Nobel Prize in Literature and was elected in 1962 Companion of Literature by the Royal Society of Literature in 1962.
