When the first report of COVID-19 appeared in December 2019 from Wuhan, China, the world unknowingly perceived this as another flu-like illness. Many were surprised at the extreme steps that China had subsequently taken to seal Wuhan from the rest of the world. However, by February 2020, the SARS-COV-2 virus, which causes COVID-10, had spread so quickly across the globe that the World Health Organization officially declared COVID-19 a pandemic (1). COVID-10 is not the first pandemic the world has seen, so what makes it so unique in Malaysia, is discussed to avoid a future coronacomma (a).

As of 26 March 2020, 171 countries have been affected by the coronavirus disease 2019 or known as COVID-19 pandemic with 467,866 infected patients and 20,845 deaths, representing a 4.5% mortality rate (2). While China is the most affected country, the rate of infection in China has slowed down significantly; however, this is not the case in Italy or the United States, which are the second and third most affected countries, respectively. Association of Southeast Asian Nations (ASEAN) countries, including Malaysia, have not been spared from COVID-19, although there have been fluctuations in the rate of infection demonstrated in the number of new cases and deaths reported in March 2020 (3). Barely three months after the first reported cases, many countries have ordered lockdowns, including Malaysia. The Malaysian government announced an initial movement restriction order on 16 March 2020 and extension to mid-April. These measures have been enacted for good reason.
