Through monsters we confront our tiny time between catastrophes and develop a recognition of Otherness by which an ethical understanding of difference becomes possible. Learning to read the monster's environmental signs often helps humans determine the scope of the monster's place in the eco-cosmic timeline and defeat it until the epic cycle inevitably repeats: monsters live and live and live. Even so, when humans identify and confront monsters, we do so at the risk of exposing our own monstrosity. When a massive creature is pushed into human proximity by the ocean's wide shoulders, the waves deposit and erode human assumptions about itself and its environment: words, sounds, breath, water, wind, flesh, blood, and bones wash in and out. Chance encounters reveal us to ourselves anew. When we look into the inky backs of whales or deep into vortices, what do we see? In October 2014, the BABEL Working Group headed to the beach. The 3rd Biennial Meeting of the BABEL Working Group was held at The University of California, Santa Barbara, where the Pacific Ocean laid her face against the sand and experienced the conference panels exploring, examining, and exalting the margins of sea and shore of earth and water. Lynn Brunelle, 2024-06-04 Follow a blue whale's enormous body to the bottom of the ocean where it sets the stage for a bustling new ecosystem to flourish. All living things must one day die, and Earth's largest creature, the majestic blue whale, is no exception. But in nature, death is never a true ending. When this whale closes her eyes for the last time in her 90-year life, a process known as whale fall is just beginning. Her body will float to the surface, then slowly sink through the deep from inflated behemoth to clean-picked skeleton. It will offer food and shelter at each stage to a vast diversity of organisms over the course of a century and beyond. Caldecott Medalist Jason Chin's astonishing artwork enriches and amplifies engaging, well-researched text by Bill Nye the Science Guy writer Lynn Brunelle. Young lovers of the macabre will relish each page of *Life After Whale*. Meanwhile, those grappling with the hard subject of death will take solace in this honest look at the circle of life, which closes on a young whale enjoying the same waves as her ancestor. Additional back pages offer further info and reading recommendations on whales, whale falls, and ecosystems. An Orbis Pictus Honor Book. A Junior Library Guild Gold Standard Selection.
