from the South to the North during and after the Civil War Janette Thomas Greenwood relates the history of a network forged between Worcester County Massachusetts and eastern North Carolina as a result of Worcester regiments taking control of northeastern North Carolina during the war White soldiers from Worcester a hotbed of abolitionism protected refugee slaves set up schools for them and led them north at war's end White patrons and a supportive black community helped many migrants fulfill their aspirations for complete emancipation and facilitated the arrival of additional family members and friends Migrants established a small black community in Worcester with a distinctive southern flavor But even in the North white sympathy did not continue after the Civil War Despite their many efforts black Worcesterites were generally disappointed in their hopes for full fledged citizenship reflecting the larger national trajectory of Reconstruction and its aftermath

Mission Cemeteries, Mission Peoples Christopher M. Stojanowski, 2013-08-06 Mission Cemeteries Mission Peoples offers clear accessible explanations of complex methods for observing evolutionary effects in populations Christopher Stojanowski's intimate knowledge of the historical archaeological and skeletal data illuminates the existing narrative of diet disease and demography in Spanish Florida and demonstrates how the intracemetery analyses he employs can provide likely explanations for issues where the historical information is either silent or ambiguous Stojanowski forgoes the traditional broad analysis of Native American populations and instead looks at the physical person who lived in the historic Southeast What did that person eat Did he suffer from chronic diseases With whom did she go to a Spanish church Where was she buried in death The answers to these questions allow us to infer much about the lives of mission peoples

Desegregating Dixie Mark Newman, 2018-10-04 Winner of the 2020 American Studies Network Book Prize from the European Association for American Studies Mark Newman draws on a vast range of archives and many interviews to uncover for the first time the complex response of African American and white Catholics across the South to desegregation In the late nineteenth and first half of the twentieth century the southern Catholic Church contributed to segregation by confining African Americans to the back of white churches and to black only schools and churches However in the twentieth century papal adoption and dissemination of the doctrine of the Mystical Body of Christ pressure from some black and white Catholics and secular change brought by the civil rights movement increasingly led the Church to address racial discrimination both inside and outside its walls Far from monolithic white Catholics in the South split between a moderate segregationist majority and minorities of hard line segregationists and progressive racial egalitarians While some bishops felt no discomfort with segregation prelates appointed from the late 1940s onward tended to be more supportive of religious and secular change Some bishops in the peripheral South began desegregation before or in anticipation of secular change while elsewhere especially in the Deep South they often tied changes in the Catholic churches to secular desegregation African American Catholics were diverse and more active in the civil rights movement than has often been assumed While some black Catholics challenged racism in the Church

many were conflicted about the manner of Catholic desegregation generally imposed by closing valued black institutions Tracing its impact through the early 1990s Newman reveals how desegregation shook congregations but seldom brought about genuine integration **Historical Geography Newsletter** ,1973 **Patterns of Economic Change by State and Area** Mary Meghan Ryan,2013-12-16 Patterns of Economic Change by State and Area Income Employment and Gross Domestic Product is a special edition of Business Statistics of the United States Patterns of Economic Change This book presents data on personal income employment and gross domestic product for the United States as a whole the seven regions each state and 366 metropolitan statistical areas MSAs Data on personal income and employment extends back to 1958 for the states and regions and to 1969 for the MSAs *Jewish Life in Small-Town America* Lee Shai Weissbach,2008-10-01 In this book Lee Shai Weissbach offers the first comprehensive portrait of small town Jewish life in America Exploring the history of communities of 100 to 1000 Jews the book focuses on the years from the mid nineteenth century to World War II Weissbach examines the dynamics of 490 communities across the United States and reveals that smaller Jewish centers were not simply miniature versions of larger communities but were instead alternative kinds of communities in many respects The book investigates topics ranging from migration patterns to occupational choices from Jewish education and marriage strategies to congregational organization The story of smaller Jewish communities attests to the richness and complexity of American Jewish history and also serves to remind us of the diversity of small town society in times past
