Resilience Thinking in Urban Planning Ayda Eraydin, Tuna Taşan-Kok, 2012-11-29 There is consensus in literature that urban areas have become increasingly vulnerable to the outcomes of economic restructuring under the neoliberal political economic ideology. The increased frequency and widening diversity of problems offer evidence that the socio-economic and spatial policies planning and practices introduced under the neoliberal agenda can no longer be sustained. As this shortfall was becoming more evident among urban policymakers, planners and researchers in different parts of the world, a group of discontent researchers began searching for new approaches to addressing the increasing vulnerabilities of urban systems in the wake of growing socio-economic and ecological problems. This book is the joint effort of those who have long felt that contemporary planning systems and policies are inadequate in preparing cities for the future in an increasingly neoliberalising world. It argues that resilience thinking can form the basis of an alternative approach to planning. Drawing upon case studies from five cities in Europe namely Lisbon, Porto, Istanbul, Stockholm and Rotterdam, the book makes an exploration of the resilience perspective, raising a number of theoretical debates and suggesting a new methodological approach based on empirical evidence. This book provides insights for intellectuals exploring alternative perspectives and principles of a new planning approach.

Handbook on Planning and Complexity Gert de Roo, Claudia Yamu, Christian Zuidema, 2020-06-26 This Handbook shows the enormous impetus given to the scientific debate by linking planning as a science of purposeful interventions and complexity as a science of spontaneous change and non-linear development. Emphasising the importance of merging planning and complexity, this comprehensive Handbook also clarifies key concepts and theories, presents examples on planning and complexity and proposes new ideas and methods which emerge from synthesising the discipline of spatial planning with complexity sciences.

The City in Need Ali Cheshmehzangi, 2020-06-08 This book fills a major gap in academic research by exploring urban resilience measures and city management issues during disruptive disease outbreak events. Based on the overarching concept of resilience thinking, it addresses critical issues of preparedness, responsiveness and reflectiveness in the event of outbreak, focusing on cities and how they should prepare to combat a variety of adversities and uncertainties caused by outbreaks. This comprehensive book is an essential guide for decision makers, city authorities, planners, healthcare and public health authorities and those communities and businesses that face disease outbreak events. It also offers a set of practical measures to support the development of tailor-made strategies in the form of an action plan. These strategies should address outbreak control and containment measures, institutional rearrangements, management of urban systems and healthiness of the society. Divided into six chapters, this book explores important topics of urban resilience and city management for preparedness, action plans and responsiveness planning. Further, it presents a comprehensive urban resilience approach used to support city management in the recent outbreaks in Chinese cities which can be applied in cities around the globe to strengthen their resilience and maximise the practicality of

urban resilience and minimise urban vulnerabilities during disease outbreaks Highlighting topics such as maintaining societal well being community engagement and multi sectoral city management enhancement this book offers a unique combination of research practices and lessons learned to aid cities in need *Participatory Research and Planning in Practice* Janez Nared,David Bole,2019-11-14 This open access book provides in depth insights into participatory research and planning by presenting practical examples of its use In particular it describes theoretical and methodological aspects of participatory research and planning as well as the implementation of participatory processes in fields such as transport planning cultural heritage management environmental planning and post earthquake recovery Further it compares participatory planning experiences from different territorial levels from the macro regional e g Southeastern Europe Mediterranean or European metropolitan regions to national regional and local levels The book will help researchers planners public administration officials decision makers and the general public to understand the advantages disadvantages and constraints of participatory planning and research Using various examples it will guide readers through the theory of participatory planning and research its methods and different perspectives on how to use it in practice *Ecological and Digital Transition in Cities* Francesca Moraci,Carmelina Bevilacqua,Pasquale Pizzimenti,2025-04-26 This open access book delves into the intersection of ecological technological and social dynamics at the core of urban transition and the relevance of urban planning and design in addressing the pressing challenges faced by cities and regions in the 21st century This book is held at Networks Markets People Communities Institutions and Enterprises toward post humanism epistemologies and AI challenges May 22 25 2024 Reggio Calabria Italy The papers included in the book follow two main drivers The first is dedicated to discussing the concept of ecosystem services exploring the role of policy and governance mechanisms in promoting the integration of ecosystem services into urban planning and design practices The second presents various data driven perspectives methodologies frameworks and case studies for measuring ecosystem services in cities ranging from traditional methods to cutting edge digital mapping and modeling techniques The book primarily targets academics researchers and students undergraduate postgraduates Ph D students providing interesting insights on the topic that can be useful for urban planning and design course in the urban studies architecture and engineering fields It targets also policymakers experts professionals and consultants active in the urban planning and design field involved in managing the transition of regions and cities **Urban Disaster Resilience and Security** Alexander Fekete, Frank Fiedrich,2017-12-04 This edited book investigates the interrelations of disaster impacts resilience and security in an urban context Urban as a term captures megacities cities and generally human settlements that are characterised by concentration of quantifiable and non quantifiable subjects objects and value attributions to them The scope is to narrow down resilience from an all encompassing concept to applied ways of scientifically attempting to measure this type of disaster related resilience 28 chapters in this book reflect opportunities and doubts of the disaster risk science community regarding this measurability

Therefore examples utilising both quantitative and qualitative approaches are juxtaposed This book concentrates on features that are distinct characteristics of resilience how they can be measured and in what sense they are different to vulnerability and risk parameters Case studies in 11 countries either use a hypothetical pre event estimation of resilience or are addressing a revealed resilience evident and documented after an event Such information can be helpful to identify benchmarks or margins of impact magnitudes and related recovery times volumes and qualities of affected populations and infrastructure
