Paul Phillips,Thomas R. Phillips,2012-12-06 *Biz Jets Technology and Market Structure in the Corporate Jet Aircraft Industry* traces the development of business jet aircraft from the mid 1950s through early 1993 It begins with a discussion of the technological and market opportunities existing in

the period prior to the introduction of the Lockheed JetStar and the North American Sabreliner The subsequent appearances of other biz jets the Learjets HS 125s Jet Commanders Falcons Gulfstreams Citations Challengers Mitsubishi's and derivative aircraft are treated in considerable detail Biz Jets also covers planes involved in many unsuccessful attempts to enter the industry from 1955 through 1993 The study shows that while the industry has been quite concentrated throughout its history the positions of the leading firms have always been contestable Indeed leaders at one point in time have often been displaced by others who succeeded in marshalling technological and market opportunities to their advantage Manufacturers have had to undertake continuous efforts to improve the price performance characteristics of their aircraft to gain and hold their market shares Rivalries in the effective use of the stream of new technologies have brought forth new aircraft with both better performance and lower operating costs At the same time however participation in the market has been extremely risky Only a few companies have been able to earn profits Entries exits and mergers have altered the structure of the industry but it remained decidedly unstable at least through 1992 *Readers' Guide to Periodical Literature* Anna Lorraine Guthrie, Bertha Tannehill, Neltje Marie Tannehill Shimer, 1989 An author subject index to selected general interest periodicals of reference value in libraries *Air Transport World* ,1986 **Government Reports Announcements & Index** ,1990-04
