Aversive Interpersonal Behaviors Robin M. Kowalski, 2013-11-11 Aversive behaviors have greater influence on social interactions than is generally acknowledged determining personal satisfaction interpersonal attraction choice of partners and the course of relationships What motivates aversive behaviors To what extent do they obtain desired outcomes In what ways are they unnecessary and destructive How do other people respond emotionally and behaviorally These are just a few of the many interesting questions addressed by the 16 respected researchers who contribute to Aversive Interpersonal Behaviors Nine chapters give this heretofore neglected subject the attention it is due probing a dark side of interpersonal relationships to understand both its destructive

and adaptive nature The Self-Conscious Emotions Jessica L. Tracy, Richard W. Robins, June Price Tangney, 2013-11-27
 Timely and authoritative this volume reviews the breadth of current knowledge on the self-conscious emotions and their role in psychological and social functioning. Leading investigators approach the subject from multiple levels of analysis ranging from basic brain mechanisms to complex social processes. Chapters present compelling advances in research on the most fundamental self-conscious emotions: embarrassment, guilt, humiliation, pride, and shame. Addressed are neural and evolutionary mechanisms, developmental processes, cultural differences and similarities, and influences on a wide array of social behaviors and personality processes. A unique chapter on assessment describes and evaluates the full range of available measures *Handbook of Individual Differences in Social Behavior* Mark R. Leary, Rick H. Hoyle, 2013-12-17
 How do individual differences interact with situational factors to shape social behavior? Are people with certain traits more likely to form lasting marriages, experience test-taking anxiety, break the law, feel optimistic about the future? This handbook provides a comprehensive, authoritative examination of the full range of personality variables associated with interpersonal judgment, behavior, and emotion. The contributors are acknowledged experts who have conducted influential research on the constructs they address. Chapters discuss how each personality attribute is conceptualized and assessed, review the strengths and limitations of available measures, including child and adolescent measures when available, present important findings related to social behavior, and identify directions for future study *Social Cognition and Communication* Joseph P. Forgas, Orsolya Vincze, János László, 2013-07-31
 Language is the essence of interpersonal behavior and social relationships, and it is social cognitive processes that determine how we produce and understand language. However, there has been surprisingly little interest in the past linking social cognition and communication. This book presents the latest cutting-edge research from a select group of leading international scholars investigating how language shapes our thinking and how social cognitive processes in turn influence language production and communication. The chapters represent diverse perspectives of investigating the links between language and communication, including evolutionary, linguistic, cognitive, and affective approaches, as well as the empirical analysis of written and spoken narratives. New methodologies are presented, including the latest techniques of text analysis, to illuminate the psychology of individual language users and entire cultures and societies. The chapters address such questions as: how are cognitive and identity processes reflected in language? How do affective states influence language production? Are politeness norms in language use effective? How do partners manage to accommodate to each other's communicative expectations? What is the role of language as a medium of interpersonal and intergroup influence? How are individual and cultural identities reflected in and shaped by narratives in literature, school texts, and the media? The book is aimed at all students, researchers, and laypersons interested in the interplay between thinking and communication and should be required reading for all professionals who use language in their everyday work to interact with people *The Psychology of Social Conflict and Aggression* Joseph P. Forgas, Arie W.

Kruglanski, Kipling D Williams, 2011-05-09 This book provides an up to date integration of some of the most recent developments in social psychological research on social conflict and aggression one of the most perennial and puzzling topics in all of psychology It offers an informative scholarly yet readable overview of recent advances in research on the nature antecedents management and consequences of interpersonal and intergroup conflict and aggression The chapters share a broad integrative orientation and argue that human conflict is best understood through the careful analysis of the cognitive affective and motivational processes of those involved in conflict situations supplemented by a broadly based understanding of the evolutionary biological as well as the social and cultural contexts within which social conflict occurs **The**

Forgas, William Crano, Klaus Fiedler, 2022-06-01 This edited volume brings together the latest research in understanding the nature origins and evolution of human sociability one of the most intriguing aspects of human psychology Sociability our sophisticated ability to interact with others imagine plan and execute interdependent behaviours lies at the heart of our evolutionary success and is the most important prerequisite for the development of increasingly elaborate civilizations With contributions from internationally renowned researchers in areas of social psychology as well as anthropology and evolutionary psychology this book demonstrates the role of social psychology in explaining how human sociability evolved how it shapes our mental and emotional lives and how it influences both large scale civilizational practices and intimate interpersonal relations Chapters cover the core psychological characteristics that shape human sociability including such phenomena as the role of information exchange affective processes social norms power relations personal relationships attachment patterns personality characteristics and evolutionary pressures Featuring a wide variety of empirical and theoretical backgrounds the book will be of interest to students and researchers in all areas of the social sciences as well as practitioners and applied professionals who deal with issues related to sociability in their daily lives **The Body and Shame** Luna Dolezal, 2015-03-31 The Body and Shame

Phenomenology Feminism and the Socially Shaped Body investigates the concept of body shame and explores its significance when considering philosophical accounts of embodied subjectivity Body shame only finds its full articulation in the presence

actual or imagined of others within a rule and norm governed milieu As such it bridges our personal individual and embodied experience with the social cultural and political world that contains us Luna Dolezal argues that understanding body shame can shed light on how the social is embodied that is how the body experienced in its phenomenological primacy by the subject becomes a social and cultural artifact shaped by external forces and demands The Body and Shame introduces leading twentieth century phenomenological and sociological accounts of embodied subjectivity through the work of Edmund Husserl Maurice Merleau Ponty Jean Paul Sartre Michel Foucault and Norbert Elias Dolezal examines the embodied social and political features of body shame contending that body shame is both a necessary and constitutive part of embodied subjectivity while simultaneously a potential site of oppression and marginalization Exploring the cultural politics of shame the final chapters of this work explore the phenomenology of self presentation and a feminist analysis of shame and gender with a critical focus on the practice of cosmetic surgery a site where the body is literally shaped by shame The Body and Shame will be of great interest to scholars and students in a wide variety of fields including philosophy phenomenology feminist theory women s studies social theory cultural studies psychology sociology and medical humanities **Adult**

Children of Divorce Geraldine K. Piorkowski, 2008-10-30 Romantic love is often an elusive fragile and tenuous state difficult to maintain across time The rates of divorce re divorce relationship violence and abuse today attest to the fact we are failing at romantic love And for teen aged and adult children of divorce romantic love can be especially elusive Because they have no roadmap for a satisfying stable romantic relationship derived from their own parents they are confused by what love is and tend to make poor partner choices Borrowing heavily from popular culture for unrealistic standards regarding love they become disillusioned when their all too ordinary lovers don t measure up Especially vulnerable to the problems their parents had they tend to overreact in a similar negative fashion and are all too ready to consider divorce when unhappiness strikes In attempting to halt intergenerational transmission of divorce Psychologist Piorkowski points to how we can recognize that American popular culture presents an overly sexualized explosive and superficial version of love that can t last With this book adult children of divorce can begin to see how they have been affected by familial experiences and develop a new realistic map to find more fulfilling and enduring romantic relationships Piorkowski in an extensive review of literature also looks at cultural factors and how they impact romantic love and marriage In contrast to American popular culture s shallow rendition of romantic love many cultures elsewhere in the world emphasize compatibility religion and family allegiance As a result says the author such marriages appear more stable than American unions built upon the shifting sands of emotion **Motivation and Its Regulation** Joseph P. Forgas, Eddie Harmon-Jones, 2014-04-03 It is motivation that drives all our daily endeavors and it is motivation or the lack of it that accounts for most of our successes and failures Motivation however needs to be carefully controlled and regulated to be effective This book surveys the most recent psychological research on how motivational processes are regulated in daily life to achieve desired outcomes Contributors are all leading international investigators and

Peter J. Burke, Jan E. Stets, 2009-08-18 All individuals claim particular identities given their roles in society groups they belong to and characteristics that describe themselves This book describes and illustrates identity theory a social psychological theory that attempts to understand identities their sources in interaction and society their processes of operation and their consequences for interaction and society from a sociological perspective Identity Theory makes the full range of this powerful new theory accessible to students and scholars at all levels **The Psychology of Attitudes and Attitude Change**

Joseph P. Forgas, 2024-07-30 Tribalism is a key evolutionary feature of humans and the recent growth in tribal polarisation presents a serious challenge to our highly individualistic civilisation This fascinating book examines the psychological origins and consequences of tribalism both in our private and in our public lives The chapters explore how social evolutionary biological

and cognitive factors shape our tribal habits featuring contributions from eminent international researchers The chapters review the nature and origins of tribalism the psychological mechanisms promoting tribalism how tribal narratives can distort rationality and perceptions of reality and the role of tribalism in politics and public affairs The contributions investigate how insecurity the search for meaning and attachment victimhood grievance and cognitive shortcomings can facilitate tribal bonding and how such groups once formed can foster conflict hatred and irrational behaviours The book suggests that the survival of our extremely successful civilisation based on the enlightenment values of liberty and individualism may well depend on our ability to understand and manage the human evolutionary propensity for tribalism The book will be of great interest to students and researchers in psychology sociology and other disciplines of behavioural and social sciences as well as all readers who seek to understand one of the most intriguing issues that shape human social life
