Decoding a Royal Marine Commando Mark Burchell,2018-10-25 With a heritage dating back to the mid seventeenth century the Royal Marines have accrued a rich history of rituals artefacts and material culture that is consciously deployed in order to define and shape the institution both historically and going forward into an uncertain future Drawing upon this heritage Mark Burchell offers a unique method of understanding how the Royal Marines draw upon this material culture in order to help transform ordinary labour power to political agency comprising acts of controlled and sustained violence He demonstrates how a barrage of objects and items including uniforms weapons landscapes architecture personal kit drills rituals and iconography are deployed in order successfully to integrate the recruits into the Royal Marines culture It is argued that this material culture is a vital tool with which to imprint the military's own image on new recruits as they embark on a process of de-individualisation Having been granted unprecedented access to the Commando Training Centre at Lympstone as an anthropologist Burchell observed an intake of recruits throughout their demanding and exhausting year-long training programme The resulting book presents to the academic community for the first time a theorised in-depth account of a relatively unexplored social community and how its material culture creates and reifies new military identities This path-breaking interdisciplinary analysis provides fresh understanding of the multiple processes of military enculturation through a meticulous revision of the relationships that exist between disciplinary and punishment practices violence and masculinity narratives and personhood and will explore how these issues are understood by recruits through their practical application of body to physical labour and by the cues of their surrounding material culture

Under the Queen's Colours Penny Legg,2012-05-01 In 1952 Queen Elizabeth ascended to the throne In the sixty years of her reign so far there have been thousands of conscripts and regular service personnel who have served under the Queen's Colours This book celebrates their

incredible achievement covering the period from 1952 to the Queen's diamond jubilee year 2012. Service men and women recall their experiences from post WW2 to the Falklands War in 1982 through to modern military service at the end of a millennium and into the first years of the twenty first century. The book looks at life in barracks at home and overseas in a variety of hot and not so hot spots and major conflicts worldwide. Male and female service personnel talk candidly about their experiences opening their world to an interested audience and allowing glimpses into military life. This book is not just about war but the everyday lives of service men and women on land, sea and in the air in celebration of a diamond jubilee.

Normandy: The Sailors' Story Nick Hewitt, 2024-04-09. The first account of the Allied navies' vital contribution to the success of the D Day landings and the Normandy campaign. The Allied liberation of Nazi occupied Europe is one of the most widely recognised events of modern history. The assault phase, Operation Neptune, began with the D Day landings in Normandy, one of the most complex amphibious operations in history involving 7,000 ships and nearly 200,000 men. But despite this immense effort, the wider naval campaign has been broadly forgotten. Nick Hewitt draws on fascinating new material to describe the violent sea battle which mirrored the fighting on land and the complex campaign at sea which enabled the Allied assault. Aboard ships ranging from frail plywood landing craft to sleek destroyers, sailors were active combatants in the operation of June 1944 and had worked tirelessly to secure the Seine Bay in the months preceding it. They fought battles against German submarines, aircraft and warships and maintained careful watch to keep control of the English Channel. Hewitt recounts these sailors' stories for the first time and shows how without their efforts, D Day would have failed.

Running Manual Sean Lerwill, 2012-02-01. Running is probably one of the most popular ways to stay fit. Although it may seem that we can all run, there is much to learn whether for beginners or seasoned runners. The Running Manual covers everything from sprinting to marathons, detailing gait analysis, how to train and what to wear. It includes the detailed physiology of how the energy systems work and how nutrition should be approached prior to and during training and races. This Haynes Manual will appeal to all levels, whether young or old, new or experienced, male or female. *A Practical Treatise on the Law of Marine Insurance* Richard Lowndes, 1881. *Down Amongst the Black Gang* Richard P. de Kerbrech, 2014-03-03. Down in the fiery belly of the luxury liners of the Titanic era, a world away from the first class dining rooms and sedate tours of the deck, toiled the black gang. Their work was gruelling and hot, and here de Kerbrech introduces the reader to the dimly lit world and workplace of Titanic's stokers. Beginning with a journey around some of the major elements of machinery that one might encounter in the giant ship's engine and boiler rooms, the sheer skill and strength that a man in this employ must have had is brought to the fore. The human side of working for Titanic and her contemporaries is also explored through an investigation of stokers' duties, their environment and conditions, what it was like to be one of them. An oft-ignored part of Titanic's story, the importance of the black gang and the job they performed is brought to life, making poignant their fate on the maiden crossing of Titanic. This certainly is a book that no Titanic era shipping historian or

researcher should be without British Coastal Forces Norman Friedman, 2023-04-30 The Royal Navy invented the fast motor torpedo boat during the First World War and used it and other small coastal craft to great effect during the Second World War British coastal forces fought a desperate battle to control the narrow seas particularly the Channel and the North Sea and took the war to the coasts of German occupied Europe fighting where larger warships could not be risked They also made a significant contribution to victory in the Mediterranean but it was primarily warfare in home waters that shaped wartime British Coastal Forces and left lessons for postwar development In this book Norman Friedman uniquely connects the technical story of the coastal craft and their weapons and other innovations with the way they fought In both world wars much of the technology was at the edge of what was feasible at the time Boats incorporated considerable British innovation and also benefited from important US contributions particularly in supplying high powered engines during World War II In contrast with larger warships British coastal forces craft were essentially shaped by a few builders and their part in the story is given full credit They also built a large number of broadly similar craft for air sea rescue and for completeness these are described in an appendix This fascinating dramatic story is also relevant to modern naval thinkers concerned with gaining or denying access to hostile shores The technology has changed but the underlying realities have not This book includes an extensive account of how coastal forces supported the biggest European example of seizing a defended shore the Normandy invasion That was by far the largest single British coastal forces operation demanding a wide range of innovations to make it possible Like other books in this series this one is based very heavily on contemporary official material much of which has not been used previously like the extensive reports of US naval observers who were allowed wide access to the Royal Navy as early as 1940 Combined with published memoirs these sources offer a much more complete picture than has previously appeared of how Coastal Forces fought and of the way in which various pressures both operational and industrial shaped them
