

How Technology Changed Our Lives

Technology has allowed us to connect with people with ease and has made many tasks so much easier. From desktops to iPhones, the world we live in allows us to communicate with anybody with wireless access with just a couple of clicks of the mouse. From listening to our favorite songs, to going to the mall, technology has made everyday life more convenient. We can text on cellphones, connect on social media and facetime with little to no effort at all. It really is amazing to see how much technology has advanced and what it allows us to do today. Even though it seems like technology has reached its limits and will stop changing, it's still improving and will probably stop improving itself. Just 20 years ago, personal computers became small and affordable enough for families to buy and use them at home.

Technology now is a concept that we cannot survive without; an average North American needs technology to, eat, entertain, to cook, and to do many other daily functions. Let's face it, we need technology to survive. But this is to an extent, for example, a computer can be one of man's best friends, it helps us write speeches, like the one you're listening to right now. It helps us obtain knowledge through the internet, and it helps us entertain ourselves with games, movies, and music. Since then, technology has shown no signs of stopping or even slowing down, it almost makes you wonder how people lived just fifty years ago. Imagining attempting to live the way your grandparents or great grandparents did, seems unimaginable right? Now within the last 10 years, technology has evolved.

With all the new technology that is introduced, it is difficult to see how technology can evolve. It seems like we are always looking for the next big thing, but we are also looking for the next big thing.
