Bernard Carlson,Erik M Conway,2024-01-08 This book drawing on fresh scholarship investigates electrification in new places and across different time periods While much of our understanding of electrification as a historical process is based on the seminal work done by Thomas P Hughes in *Networks of Power* 1983 the scholars in this volume expand and revise Hughes systems approach to suggest that electrification is a heterogeneous and contingent process Moreover the contributors suggest that the conquest of the world by electricity remains incomplete despite more than a century elapsing Above all though this book provides context for thinking about what lies ahead as humans continue their conquest of the earth through electricity As we become increasingly dependent on electricity to power our lights heat and cool our homes turn the wheels of industry and keep our information systems humming so we are ever more vulnerable when the grid runs into trouble Chapter Surveying the Landscape The Oil Industry and Alternative Energy in the 1970s is available open access under a Creative Commons Attribution 4 0 International License via link [springer.com](https://www.springer.com)      **Electrical Manufacturing** ,1953      Annual Report of the Commissioner of Patents United States.
