Pidgin English Du Cameroun:

Sociolinguistic and Structural Aspects of Cameroon Creole English Aloysius Ngefac, 2016-08-17 Based on current data the book provides a detailed sociolinguistic and structural description of Cameroon Creole English with a special focus on aspects that are often used in creolistic literature as putative defining features of bona fide prototypical creoles It is the first comprehensive research monograph on the language that describes and situates its sociolinguistic and structural aspects within the context of current creolistic debate and answers the following unanswered questions How is the evolutionary trajectory of the language and which theory of pidgins and creoles genesis best accounts for its origin and development What is its current sociolinguistic status Is the language a pidgin or a creole What is the typological distance between the language and its main lexifier What is its relationship with the other West African contact languages and other creole languages In spite of the controversy that characterizes the field of creolistics regarding the defining characteristics of pidgins and creoles the book suggests for instance that if the different routes to creolization are recognized it will be much easier to come up with putative characteristics that define the developmental status of any contact language as is the case with Cameroon Creole English *Corpus Linguistics and African Englishes* Alexandra U. Language Contact. Volume 2 Jeroen Darquennes, Joseph C. Salmons, Wim Vandebussche, 2025-04-21 Targeting a full range of students and scholars this volume provides a total of 50 chapters illustrating the linguistic dynamics and the dynamics of inter individual and societal language contact as well as the

dynamics of multidisciplinary language contact studies Fueled by a wealth of data from a rich variety of contact situations its geographically balanced case studies are governed by the triangulation between a focus on language structure and change a sincere drive of sociopolitical and academic agency and the confrontation with an everyday reality that can be unkind to and ignorant of those two factors The volume clearly demonstrates the social relevance of our trade in a time burdened with ecolinguistic challenges *Cameroon* Loreto Todd,1982 Spoken examples of the book **Cameroon** Loreto Todd,1982 This volume on the Cameroonian English contains two main sections The first section is devoted to the history of language contact in Cameroon contact with Islam and contact with Europeans the development of English in Cameroon the teaching of English in Cameroon in various stages of its history and on idiosyncratic aspects of this variety of English The second section is the text part of the volume consisting of sixteen printed texts mostly modern but also five extracts of historical significance eleven written texts essays on pedagogical subjects personal letters a folk history an academic paper and literary extracts and 13 oral texts interviews radio These texts have been selected because of their linguistic interest and because of the information they provide on Cameroonian life and culture **Scribbles from the Den** Dibussi Tande,2009 49 insightful essays which originally appeared on his award winning blog Scribbles from the den Page 4 of cover *Urban Contact Dialects and Language Change* Paul Kerswill,Heike Wiese,2022-03-30 This volume provides a systematic comparative treatment of urban contact dialects in the Global North and South examining the emergence and development of these dialects in major cities in sub Saharan Africa and North Western Europe The book s focus on contemporary urban settings sheds light on the new language practices and mixed ways of speaking resulting from large scale migration and the intense contact that occurs between new and existing languages and dialects in these contexts In comparing these new patterns of language variation and change between cities in both Africa and Europe the volume affords us a unique opportunity to examine commonalities in linguistic phenomena as well as sociolinguistic differences in societally multilingual settings and settings dominated by a strong monolingual habitus These comparisons are reinforced by a consistent chapter structure with each chapter presenting the linguistic and social context of the region information on available data including corpora sociolinguistic and structural findings a discussion of the status of the urban contact dialect and its stability over time The discussion in the book is further enriched by short commentaries from researchers contributing different theoretical and geographical perspectives Taken as a whole the book offers new insights into migration based linguistic diversity and patterns of language variation and change making this ideal reading for students and scholars in general linguistics and language structure sociolinguistics creole studies diachronic linguistics language acquisition anthropological linguistics language education and discourse analysis *Complex Processes in New Languages* Enoch O. Aboh,Norval Smith,2009-12-17 In recent years there has been a new interest in evaluating complex structures in languages The implications of such studies are varied e g the distinction between supposedly more complex and less complex languages how

complexity relates to human knowledge of language and the role of the reduction or increase of complexity in language change and creolization This book focuses on the latter issue but the conclusions presented here hold of typological complexity in general The chapters in this book show that the notion of complexity as conceived of in linguistics mainly centres on the outer manifestations of language e g numbers of affixes This exercise is useful in establishing the patterning of languages in terms of their degrees of analyticity or synthesis but it fails to address the properties of the inner rules of these grammars and how these relate to the computational system that governs the human language capacity Put simply issues of complexity should not be equated with the complexity observed in surface patterns of grammars alone Global Fragments ,2007-01-01 While the world seems to be getting ever smaller and globalization has become the ubiquitous buzz word regionalism and fragmentation also abound This might be due to the fact that far from being the alleged production of cultural homogeneity the global is constantly re defined and altered through the local This tension pervading much of contemporary culture has an obvious special relevance for the new varieties of English and the literature published in English world wide Postcolonial literatures exist at the interface of English as a hegemonic medium and its many national regional and local competitors that transform it in the new English literatures Thus any exploration of a globalization of cultures has to take into account the fact that culture is a complex field characterized by hybridization plurality and difference But while global or transnational cultures may allow for a new cosmopolitanism that produces ever changing fluid identities they do not give rise to an egalitarian global village an asymmetry between centre and periphery remains largely intact albeit along new parameters The essays collected in this volume offer readings of literary theoretical and filmic texts from the postcolonial world These texts are read as attempts to articulate the global with the local from a perspective of immersion in the actual diversity of life worlds focusing on such issues as consumption identity politics and modes of affiliation In this sense they are global fragments locally refracted figurations of an experience of world wide interconnectedness The Handbook of World Englishes Braj B. Kachru,Yamuna Kachru,Cecil L. Nelson,2009-02-09 The Handbook of World Englishes is a collection of newly commissioned articles focusing on selected critical dimensions and case studies of the theoretical ideological applied and pedagogical issues related to English as it is spoken around the world Represents the cross cultural and international contextualization of the English language Articulates the visions of scholars from major varieties of world Englishes African Asian European and North and South American Discusses topics including the sociolinguistic contexts of varieties of English in the inner outer and expanding circles of its users the ranges of functional domains in which these varieties are used the place of English in language policies and language planning and debates about English as a cause of language death murder and suicide
