Democratic Republic of the Congo International Monetary,International Monetary Fund. Fiscal Affairs Dept.,2023-01-30 This technical report discusses the results of the Public Investment Management Assessment PIMA of the Democratic Republic of Congo DRC undertaken in March 2022 Despite some recovery in the 2000s the levels of public investment in the DRC remain well below the average for comparator countries and access and quality of infrastructure are very poor with major risks of deterioration While the government aims to meet part of these needs by creating fiscal space successful infrastructure development will hinge on improvements in investment efficiency which can be achieved by strengthening public investment management practices Public investment management in the DRC suffers from weaknesses across the whole project cycle both on paper legal and regulatory framework and in practice Efficient project management is hampered by administrative and legal fragmentation which leads to dilution of capacity and by budget credibility issues This report proposes seven high priority recommendations that could greatly improve public investment management in the short to medium term The report also includes the results of the climate module of the PIMA evaluation which reflect that the DRC s commitments in the fight against climate change are beginning to feed into public investment management practices

Forthcoming Books Rose Arny,1990 **Public Investment Management Reference Guide** Jay-Hyung Kim,Jonas Arp Fallov,Simon Groom,2020-03-03 The Public Investment Management PIM Reference Guide aims to convey country experiences and good international practices as a basis for decisions on how to address a country specific PIM reform agenda

The country references are drawn largely from previous diagnostics and technical assistance reports of the World Bank. The application of country diagnostics and assessments has revealed a need to address the following issues when undertaking a country reform in PIM:

- Clarification of the definition and scope of public investment and public investment management
- Establishment of a sound legal regulatory and institutional setting for PIM making sure it is linked to the budget process
- Allocation of roles and responsibilities for key players in PIM across government
- Strengthening of guidance on project preappraisal appraisal and selection prioritization procedures and deepening of project appraisal methodologies
- Integration of strategic planning project appraisal selection and capital budgeting
- Management of multiyear capital budget allocations and commitments
- Efforts to address effective implementation procurement and monitoring of projects
- Strengthening of asset management and ex post evaluation
- Integration of PIM and public private partnership PPP in a unified framework
- Rationalization and prioritization of the existing PIM project portfolio
- Development of a PIM database and information technology in the form of a PIM information system

The PIM Reference Guide does not seek to provide definitive answers or standard guidance for the common PIM issues facing countries. Nor does it seek to provide a detailed template for replication across countries; this would be impossible given the diversity of country situations. Instead, each chapter begins with an overview of the specific reform issue, lists approaches and experiences from different countries, and summarizes the references and good practices to be considered in designing country specific reform actions.
