eliminate those questions Children begin solving real life problems that get progressively harder perhaps even pushing your own limits of concentration but I guarantee your child will breeze through the material At the end of this book we introduce the concept of the unknown as a way to keep track of the bits and parts of a problem Then your child will fully understand why they are learning algebra not just how to do the problems A Lesson A Day Is The Best Way Each lesson is meant to be done in one day and is designed to be flexible If your child understands right away then encourage them and move on If however your child doesn't understand a topic then I provide alternative teaching methods for you to try in the teacher's guide section at the end of this book Curricula Designed For Both Independent Learning Or Working With You Whatever Is Best For Your Child The lessons are laid out in a fashion that allows your child to work independently as much as possible You generally need to spend a few minutes with your child prior to any independent work in order to set the stage for the day's learning Depending on your child's age and ability to work independently you may feel most comfortable working through the entire lesson each day with your child I have found with my own kids that on some days they really want to work by themselves and on others they really want to do the lesson together This curriculum is designed to handle both scenarios and allows you to be completely flexible Public School Algebra on the Inductive Method : Intended as an Introductory Series of Development Lessons to Form a Guide to Oral Teaching and a Thorough Introduction to Larger Works C.
