hieroglyphics form by Professor Simon Cardinal The diaries were apparently part of the stash that was discovered by those modern day grave robbers Howard Carter and Lord Carnarvan Although the diaries only begin as the Boy King turns 12 years of age he was the ruler of ancient Egypt 1340 bc from the age of 8 or 9 He was a tiny little teenager never getting to more than 5 feet 6 inches with numerous health problems and died at the tender age of 18 but he packed a lot into those short lived years including marriage and coronation At last a first person account of his short life so much of which is still uncertain is revealed by the boy himself The Monkey Wars Deborah Blum,1995-12-14 The controversy over the use of primates in research admits of no easy answers We have all benefited from the medical discoveries of primate research vaccines for polio rubella and hepatitis B are just a few But we have also learned more in recent years about how intelligent apes and monkeys really are they can speak to us with sign language they can even play video games and are as obsessed with the games as any human teenager And activists have also uncovered widespread and unnecessarily callous treatment of animals by researchers in 1982 a Silver Spring lab was charged with 17 counts of animal cruelty It is a complex issue made more difficult by the combative stance of both researchers and animal activists In The Monkey Wars Deborah Blum gives a human face to this often caustic debate and an all but human face to the subjects of the struggle the chimpanzees and monkeys themselves Blum criss crosses America to show us first hand the issues and personalities involved She offers a wide ranging informative look at animal rights activists now numbering some twelve million from the moderate Animal Welfare Institute to the highly radical Animal Liberation Front a group destructive enough to be placed on the FBI s terrorist list And she interviews a wide variety of researchers many forced to conduct their work protected by barbed wire and alarm systems men and women for whom death threats and hate mail are common She takes us to Roger Fouts s research center in Ellensburg Washington where we meet five chimpanzees trained in human sign language and we visit LEMSIP a research facility in New York State that has no barbed wire no alarms and no protesters chanting outside because its director Jan Moor Jankowski listens to activists with respect and treats his animals humanely And along the way Blum offers us insights into the many side issues involved the intense battle to win over school kids fought by both sides and the danger of transplanting animal organs into humans As it stands now Blum concludes the research community and its activist critics are like two different nations nations locked in a long bitter seemingly intractable political standoff But if you listen hard there really are people on both sides willing to accept and work within the complex middle When they can be freely heard then we will have progressed to another place beyond this time of hostilities In The Monkey Wars Deborah Blum gives these people their voice **Intelligent Design** Denise Little,2009-09-01 These ten original stories explore one of the most heatedly debated topics today From a tale that examines whether life on Earth is an out of control science project to one which reveals which species will inherit the planet to a portrait of a scientist determined to discover the truth about God the stories in this anthology tackle the big questions in ways that range from startling to satirical and are always entertaining *Image And*
