Writers in the Zone of Proximal Development Elizabeth Petrick-Steward,2012-10-12 How do young children bridge the gap between writing a story with pictures and writing with words How children learn to use written words to tell a story is a topic important to both cognitive development and early literacy instruction Using the theoretical framework developed by Vygotsky the behavior of a group of prekindergarten children as they author two consecutive pieces of writing is analyzed The children tell their stories at first with spoken words and pictures As they discuss their work in progress in public conferences they discover how to build on and combine existing skills to produce a new skill telling stories with written words Current descriptive and theoretical perspectives on beginning writing are presented in this volume with a particular focus on Vygotsky s concept of the zone of proximal development a period of sensitivity in which learning advances The proposed mechanism of change is verbal mediation talk among peers and teachers as they discuss work in progress which moves the children through the zone of proximal development An open whole language approach to literacy instruction makes the classroom in this book an ideal arena in which to observe verbal mediation in operation Children are free to question criticize and argue and in the process they collectively advance their developing ability to use written language The work is unique in that the rich and comprehensive data record is reproduced in its entirety More than 400 illustrations of the children s products two books apiece pictured before and after the children s revisions are included along with transcripts of

the conferences about each of the pages permitting direct observation of the effects of verbal mediation This dynamic study documents change during a period of time when specific learning is occurring and provides strong support for the value and power of Vygotsky s theoretical framework Congressional Record United States.
