Complexities and Challenges for Securing Digital Assets and Infrastructure Aldweesh, Amjad Yousef, 2025-05-14 Autonomous and digital systems have changed numerous industries including healthcare finance

It provides actionable strategies, best practices, and proven methodologies to fortify digital defenses and enhance cybersecurity. Covering topics such as human-centric threats, organizational culture, and autonomous vehicles, this book is an excellent resource for cybersecurity professionals, IT managers, policymakers, business leaders, researchers, scholars, academicians, and more.

Punch-Drunk on Co2...Dizzy from Spin Peter Sullivan, 2013-06-15

Prior to the 2009 Copenhagen climate conference, it became evident that no discernible global warming had occurred since 1998, despite a significant increase in carbon dioxide emissions. Consequently, the catastrophic man-made global warming hypothesis of the Intergovernmental Panel on Climate Change (IPCC) was conveniently rebranded as climate change. This book allows readers with little or no understanding of the issues behind the climate change debate to obtain an appreciation as to why so much doubt and suspicion has been cast over the IPCC and its gold standard climate science. The IPCC Fourth Assessment Report, often referred to as the settled science backed by a consensus of scientists, is revealed to be misleading or just plain wrong, and that the IPCC's climate alarmism is not actually backed by science but rather by shonky predictions from unreliable computer models. It also makes it evident that man-made global warming alarmism has been driven largely by politics and environmentalism, using any means possible to justify action to halt catastrophic man-made global warming. Climate change, warming that has not in fact been happening, is the result. This book will leave the reader better informed about the IPCC and its climate alarmism, about carbon dioxide, temperature data, climate model predictions, and misleading claims, as well as about the efforts of sceptics in revealing why the hypothesis of the IPCC and its alarmist claims are not valid.
