Human Rights and International Criminal Law Borhan Uddin Khan, Md. Jahid Hossain Bhuiyan, 2022-03-16 This book examines the importance of international criminal law in promoting and defending human rights as well as its relationship with law and international politics. It highlights criminal cases at the International Criminal Tribunals for the former Yugoslavia and the International Criminal Tribunals for Rwanda, the International Criminal Court, and the International Crimes Tribunal of Bangladesh. The book considers human rights approaches to crimes from a theoretical and practical perspective, analyses various crimes under international law, and examines the application, implementation, and enforcement of international criminal law. This book will serve as an important reference for students, teachers, scholars, and lawyers specialising in international human rights, international criminal law, and international humanitarian law.

Child Soldiers in the Age of Fractured States Scott Gates, Simon Reich, 2010-01-31 Current global estimates of children engaged in warfare range from 200,000 to 300,000. Children's roles in conflict range from armed and active participants to spies, cooks, messengers, and sex slaves. *Child Soldiers in the Age of Fractured States* examines the factors that contribute to the use of children in war, the effects of war upon children, and the perpetual cycle of warfare that engulfs many of the world's poorest nations. The contributors seek to eliminate myths of historic or culture-based violence and instead look to common traits of chronic poverty and vulnerable populations. Individual essays examine topics such as the legal and ethical aspects of child soldiering, internal UN debates over enforcement of child protection policies, economic factors, increased access to small arms, displaced populations, resource endowments, forced government conscription, rebel-enforced quota systems, motivational techniques employed in recruiting children, and the role of girls in conflict. The contributors also offer viable policies to reduce the recruitment of child soldiers, such as the protection of refugee camps by outside forces, naming and shaming, and criminal prosecution by international tribunals. Finally, they focus on ways to reintegrate former child soldiers into civil society in the aftermath of war.

Public Hearings on International Child Labor United States. Dept. of Labor. International Child Labor Office, 1998
Documenting the Undocumented Veronica P. Fynn, 2010 Proceedings of the annual conference held Apr 16-17 2009 at York University

Reimagining Child Soldiers in International Law and Policy Mark A. Drumbl, 2012-01-26 Child soldiers are generally perceived as faultless passive victims. This ignores that the roles of child soldiers vary from innocent abductee to wilful perpetrator. This book argues that child soldiers should be judged on their actions and that treating them like a homogenous group prevents them from taking responsibility for their acts.

Bureau of International Labor Affairs,1998 **Military Training And Children In Armed Conflict** Jenny Kuper,2005 During recent armed conflicts such as those in Iraq the former Yugoslavia and Rwanda public attention was repeatedly caught by images of children both as civilians and as soldiers Those conflicts like so many others were vivid reminders that where there is armed conflict there are also almost always children Soldiers and officers fulfil many roles in relation to such children sometimes as combatants sometimes as humanitarian workers sometimes as protectors and or sometimes as enemies and abusers This book aims to address three main questions what are the obligations of officers of national armed forces in relation to children either civilians or combatants whom they or those under their command may encounter while participating in situations of armed conflict How realistic and achievable are these obligations How can compliance with them be encouraged monitored and or enforced The book examines these questions in the context of military training In doing so it has another inextricably linked aim to see if there are ways in which the training of officers can improve the protection of children in armed conflict situations in accordance with international law and policy It is intended for use particularly by those involved in training of national armed forces including officers themselves and members of governments non governmental organisations NGOs and inter governmental organisations It is hoped that it will also be of interest to lawyers academics and others concerned with child rights and related law and policy It contains examples of actual training materials that can be modified for use in different countries and contexts *The Oxford Handbook of Women, Peace and Security* Sara E. Greenhill,2011-05-15 At least 200 000 250 000 people died in the war in Bosnia There are three million child soldiers in Africa More than 650 000 civilians have been killed as a result of the U S occupation of Iraq Between 600 000 and 800 000 women are trafficked across borders every year Money laundering represents as much as 10 percent of global GDP Internet child porn is a 20 billion a year industry These are big attention grabbing numbers frequently used in policy debates and media reporting Peter Andreas and Kelly M Greenhill see only one problem these numbers are probably false Their continued use and abuse reflect a much larger and troubling pattern policymakers and the media naively or

deliberately accept highly politicized and questionable statistical claims about activities that are extremely difficult to measure. As a result, we too often become trapped by these mythical numbers with perverse and counterproductive consequences. This problem exists in myriad policy realms. But it is particularly pronounced in statistics related to the politically charged realms of global crime and conflict: numbers of people killed in massacres and during genocides, the size of refugee flows, the magnitude of the illicit global trade in drugs and human beings, and so on. In *Sex, Drugs, and Body Counts*, political scientists, anthropologists, sociologists, and policy analysts critically examine the murky origins of some of these statistics and trace their remarkable proliferation. They also assess the standard metrics used to evaluate policy effectiveness in combating problems such as terrorist financing, sex trafficking, and the drug trade.
