Migration and Citizenship

Attribution Maarten Vink,2013-09-13 How do states in Western Europe deal with the challenges of migration for citizenship The legal relationship between a person and a state is becoming increasingly blurred in our mobile transnational world This volume deals with the membership dimension of citizenship specifically the formal rules that states use to attribute citizenship These nationally specific rules determine how and under what conditions citizenship is attributed by states to individuals how one can acquire formal citizenship status but also how this status can be lost Migration and Citizenship Attribution observes various trends in citizenship policies since the early 1980s analysing historical patterns and recent changes across Western Europe as well as examining specific developments in individual countries Authors explore the equal treatment of women and men with regard to descent based citizenship attribution along with the process of convergence between countries with ius soli and ius sanguinis traditions with regard to birthright provisions They consider how the increasing acceptance of multiple citizenship is reflected in a dual trend to abolish or at least to moderate the renunciation of the citizenship of origin as a condition for naturalisation and also to restrict provisions of loss of citizenship due to voluntary acquisition of a foreign citizenship Another trend observed and discussed is the introduction by many countries of language tests and integration conditions in the naturalisation procedure with some countries now concluding the naturalisation process by means of a US styled citizenship ceremony Contributors also explore the various things taken into account under state citizenship laws such as statelessness or membership of the European Union This book was originally published as a special issue of the Journal of Ethnic and Migration Studies

Migrants, Refugees and Asylum Seekers' Integration in European Labour Markets Veronica Federico,Simone Baglioni,2021-04-21 This open access book discusses how and to what extent the legal and institutional regimes and the socio cultural environments of a range of European countries the Czech Republic Denmark Finland Greece Italy Switzerland and the UK in the framework of EU laws and policies have a beneficial or negative impact on the effective capacity of these countries to integrate migrants refugees and asylum seekers into their labour markets The analysis builds on the understanding of socio cultural institutional and legal factors as barriers or enablers elements that may facilitate or obstruct the integration processes The book examines the two dimensions of integration being access to the labour market which translated into a rights language means the right to work with its corollaries recognition of qualifications vocational training etc and non discriminatory working conditions which translated into a rights language means right to both formal and substantial equality and its corollaries of benefits and duties deriving from joining the labour market It thereby offers a novel approach to labour market integration and migration asylum issues given its focus on legal aspects which includes most recent policy changes and legal decisions including litigation cases The robust evidence based and comparative research illustrated in the book provides academics and students but also

practitioners and policy makers with up to date knowledge that will likely impact positively on policy changes needed to better address integration conundrums
