Gender, Vulnerability Theory and Public Procurement S.N. Nyeck,2023-07-28 Taking up the concept of vulnerability this book examines the gendered impact of market based procurement practices In recent years ideological shifts and real managerial constraints have forced states everywhere to rely on private resources to solve public problems Focusing on instances where the state retains ownership of assets and rights even if it temporarily devolves its authority to a private entity profit or non profit this book uncovers the ways in which these private actors are not just suppliers of materials goods but increasingly policy influencers More specifically the book focuses on the gendered dynamics within the law policy and practice of public procurement and investigates how vulnerability is conceptualized and coded in the process of public acquisition of works goods and services from private suppliers In this book a series of rich case studies from Africa the Middle East and Europe show how vulnerability theory can inform the design of public institutions that are more responsible and responsive to gender informed demands for social justice This is the first book to integrate vulnerability theory into public procurement studies in global and comparative perspectives and it will appeal to scholars and others with interests in gendered dynamics in law and society international development public policy and international political economy

Meloche, Laure Spake, Katherine L. Nichols, 2020-11-29 Working with and for Ancestors examines collaborative partnerships that have developed around the study and care of Indigenous ancestral human remains In the interest of reconciliation museums and research institutions around the world have begun to actively seek input and direction from Indigenous descendants in establishing collections care and research policies However true collaboration is difficult time consuming and sometimes awkward By presenting examples of projects involving ancestral remains that are successfully engaged in collaboration the book provides encouragement for scientists and descendant communities alike to have open and respectful discussions around the research and care of ancestral human remains Key themes for discussion include new approaches to the care for ancestors the development of culturally sensitive museum policies the emergence of mutually beneficial research partnerships and emerging issues such as those of intellectual property digital data and alternatives to destructive analyses Critical discussions by leading scholars also identify the remaining challenges in the repatriation process and offer a means to continue moving forward This volume will appeal

to a broad interdisciplinary audience interested in collaborative research and management strategies that are aimed at developing mutually beneficial relationships between researchers and descendant communities This includes students and researchers in archaeology anthropology museums studies and Indigenous communities Freedom of Information and the Developing World Colin Darch, Peter G Underwood, 2009-12-14 Rather than simply summarising the state of play in African countries and elsewhere *Freedom of Information and the Developing World* identifies and makes explicit the assumptions about the citizen's relationship to the state that lie beneath Freedom of Information FoI discourse The book goes on to test them against the reality of the pervasive politics of patronage that characterise much of African practice Develops a discourse about the concept of FoI Discussion of the human rights claim appropriates the concepts of Hohfeldian analysis for more radical purposes in support of the idea that the state has a duty to implement FoI practices *Innovating in a Secret World* Tina P. Srivastava, 2019-07-01 Our national security increasingly depends on access to the most sophisticated and advanced technology Yet the next time we set out to capture a terrorist leader we may fail Why The answer lies in a conflict between two worlds One is the dynamic global commercial world with its thriving innovations The other is the world of national security in which innovation is a matter of life or death The conflict is about secrecy *Innovating in a Secret World* is a detailed examination of the U S government and innovation landscapes and of the current trends in often secret national security related research and development R D Based on case studies detailed research and interviews with executives at Fortune 500s startup entrepreneurs and military directors and program managers this accessible and timely book is a must read Tina P Srivastava evaluates whether the strategy of technology innovation in the world of national security leaves certain innovations behind or unintentionally precludes certain classes of innovators from participating She identifies the unintended consequences and emergent behaviors of this conflict This examination unfolds in a complex dynamic system that includes the legal framework in which technology innovation must exist For more than a decade Srivastava has been on the front lines of cutting edge technology innovation She suggests focusing on an emerging class of R D strategy called open innovation a strategy that broadens participation in innovation beyond an individual organization or division traditionally assigned to perform R D activities Through compelling stories of commercial and early government applications she shows how open technology innovation strategies can enable accelerate and enhance technology innovation Successful incorporation of open innovation into the previously closed U S government R D landscape can yield profound benefits to both national security and global leadership **Regulating and Managing Food Safety in the EU** Harry Bremmers, Kai Purnhagen, 2018-08-01 This book analyses EU food law from a regulatory economic and managerial perspective It presents an economic assessment of strategies of food safety regulation and discusses the different regulatory regimes in EU food law It examines the challenges of food safety in the internal market as well as the regulatory tools that are available The book's generic theorising and measurement of regulatory effects is supplemented by detailed analysis of key topics in food markets

such as health claims enforcement strategies and induced risk management at the level of the organizations producing food. The regulatory effects discussed in the book range from classical regulatory analysis covering e.g. effects of ex ante versus ex post regulation and content related versus information related regulation to new regulatory options such as behavioral regulation. The book takes as its premise the idea that economic considerations are basic to the design and functioning of the European food supply arena and that economic effects consolidate or induce modification of the present legal structures and principles. The assessments, analyses and examination of the various issues presented in the book serve to answer the question of how economic theory and practice can explain and enhance the shaping and modification of the regulatory framework that fosters safe and sustainable food supply chains.

Human Factors in Traffic Safety for Highway and

Traffic Engineers Alexei Tsyganov, 2025-07-01. Human Factors in Traffic Safety for Highway and Traffic Engineers provides human factors principles and findings to allow nonexperts to consider the road user's capabilities and limitations more effectively into the practice of design, operations and safety. It provides data and insights on the needs, capabilities and limitations of road users including perception and effects of visual demands, cognition and influence of expectations on driving behavior. It bridges the gap between human factors research and practical application, presenting complex psychological insights in an accessible manner. This book begins with Part 1 explaining the significance of the traffic safety problem and giving an overview of the importance of human factors in highway design and traffic engineering. Part 2 focuses on driver information perception and processing including perception of depth and speed, driver's visual search, how road users search for information and how mental and information load affects drivers' performance. Part 3 provides results of investigations of traffic crash causation and reviews major driver errors. Part 4 then describes key principles of road users' considerations during highway design and traffic operation. Finally, Part 5 focuses on safety analysis and assessment and describes in detail the existing methods to evaluate human factors during safety assessments. This is a valuable resource for professionals in highway and traffic engineering, researchers, policymakers, urban planners and students to understand how human factors contribute to traffic incidents and how to mitigate these through design and operational strategies. Combines theory and empirical evidence with practical value, giving readers the necessary background as well as practical solutions and actionable data. Translates complex psychological terminology and academic findings into accessible insights, helping practitioners to integrate human centered design principles effectively into their projects. Provides practitioners with enhanced analytic tools for traffic safety evaluation and development of effective safety countermeasures.
