Social Indicators for Aboriginal Governance

John Taylor,2004-10-01 The Council of Australian Governments is trialing Indigenous Community Coordination Pilot schemes around the country aimed at fostering whole of government approaches to service delivery and development A notable example is in the Thamarrurr region of the Northern Territory focused on the Aboriginal town of Wadeye and its hinterland Under new governance arrangements the Thamarrurr Regional Council has identified a need to profile existing social and economic conditions as a basis for its current planning and future evaluation This study provides an innovative template for such profiling With substantial input from local people it uncovers a region of high population growth with major challenges

in areas of employment income education and training housing and infrastructure health status and criminal justice It yields a baseline of available data to assist discussions of regional needs aspirations and development capacities By using population projections it shifts government and community thinking away from reactive responses to historic need to a more pro active future oriented approach to development The Thamarrurr people view this document as an important planning tool for their people Their aim is to have the same access to services and opportunities as other Australians Give every kid a chance is their catch cry This study lays out what is required from governments and the community to achieve that vision
