[Disability, Criminal Justice and Law](#) Linda Steele, 2020-04-29 Through theoretical and empirical examination of legal frameworks for court diversion this book interrogates law s complicity in the debilitation of disabled people In a post deinstitutionalisation era diverting disabled people from criminal justice systems and into mental health and disability services is considered therapeutic humane and socially just Yet by drawing on Foucauldian theory of biopolitics critical legal

and political theory and critical disability theory Steele argues that court diversion continues disability oppression It can facilitate criminalisation control and punishment of disabled people who are not sentenced and might not even be convicted of any criminal offences On a broader level court diversion contributes to the longstanding phenomenon of disability specific coercive intervention legitimates prison incarceration and shores up the boundaries of foundational legal concepts at the core of jurisdiction legal personhood and sovereignty Steele shows that the United Nations Convention on the Rights of Persons with Disabilities cannot respond to the complexities of court diversion suggesting the CRPD is of limited use in contesting carceral control and legal and settler colonial violence The book not only offers new ways to understand relationships between disability criminal justice and law it also proposes theoretical and practical strategies that contribute to the development of a wider re imagining of a more progressive and just socio legal order The book will be of interest to scholars and students of disability law criminal law medical law socio legal studies disability studies social work and criminology It will also be of interest to disability prisoner and social justice activists

Corporations and Disability Rights

Neha Pathakji, 2018-05-08 The emergence of a decentralized fragmented and low cost Internet opened up possibilities for persons with disabilities to lead an independent and inclusive life which had been denied to them in the physical world The virtual world unlike the physical world was presumed to be devoid of physical social and attitudinal barriers that have historically led to the marginalization and exclusion of persons with disabilities Yet with advancement in technology concerns of persons with disabilities to access the Internet were relegated to the background Since the Internet is largely dominated by corporations this digital divide cannot be bridged without questioning their role and corporations as gatekeepers of the virtual world need to proactively engage in dismantling barriers to accessing the Internet Corporations and Disability Rights engages with the contemporary discourse on the nature of the right to access the Internet and contextualizes this right within the framework of emerging disability rights jurisprudence This book explores the interplay between human rights of persons with disabilities and corporate obligation in a technologically advanced society It argues that under disability rights jurisprudence the right to access the Internet is a human right and not merely an enabling right It bridges the existing normative and regulatory gaps for the effective realization of the right to access the Internet
