Pyne, 2014-10-07 From the time of the continent's formation tens of millions of years ago as the Gondwana twin of Antarctica Australia has been dominated by fire much as its sister has been by ice Now Stephen Pyne one of our foremost environmental historians proposes a major reinterpretation of the Australian experience by using fire and Australia to explain one another He narrates the story of how fire came to Australia and interacted with the Australian biota and its human inhabitants while at the same time he relates the planetary saga of fire as it has been played out on this special island continent Much as the Aborigines exploited fire to remake their environment into something more usable so Stephen Pyne exploits fire to transform the landscape of history into something more accessible to use its transmuting power to extract new meaning out of familiar events Pyne traces the impact of fire from its initial influence on the evolving vegetation of the new continent through its use by the Aborigines and the subsequent European settlers to the holocaust of February 1983 known as Ash Wednesday and he shows us that the dynamic nature of fire has made it a most powerful environmental determinant in Australia shaping both its social and natural histories In his critically acclaimed study of Antarctica *The Ice* Pyne explored the myriad dimensions of the cold continent now *Burning Bush* offers us an equally absorbing examination of a continent informed by fire **Making**

Sense of Natural Disasters Graham Dwyer, 2022-03-08 This book examines the ways in which emergency management organizations make sense and learn from natural disasters Examining recent bushfires in Australia it demonstrates that whilst public inquiries that follow such disasters can be important for learning and change they have ultimately created a learning vacuum insofar as their recommendations repeat themselves This has kept governments and society focused on learning lessons about the past rather than for the future Accordingly this book recommends a new approach to sensemaking and learning focused on prospective planning rather than retrospective recommendations and where planning for the future is seen as the shared responsibility of the government society and the emergency management community in Australia and

Bureau of Foreign Commerce, 1892 **Australian National Bibliography: 1992** National Library of Australia, 1988 **Burning Issues** Mark Adams, Peter Attiwill, 2011-06-16 Southern Australia is one of the three most fire prone areas on Earth After more than a century of urban growth and valiant efforts to tame the bush recent decades have seen more people moving back onto the fringe or into the middle of this volatile landscape As this movement has intensified so has the debate on how to best protect life and property from the ever present bushfire threat A long running drought and a predicted warming climate have ensured that bushfire is a dominant factor in our nation's long term planning Following the tragic Victorian Black Saturday fires in 2009 a much greater urgency now confronts policy makers land and fire managers and communities living in bushfire areas This has led to

a call for a single simple answer on fuel reduction burning to reduce the bushfire risk Burning Issues explains that this is a complex issue without such a simple answer The book gives an account of the role of fire in Australia s ecosystems how we have to accept and live with fire and how we can manage fire both for safety and for diversity It aims to change people s attitudes to fire and to be influential in encouraging changes in land management by government agencies **Inferno** Roger Franklin,2010 In the words of Roger Franklin fire can be a curious wonderful thing On February 7 2009 however there was nothing wonderful about the flames that engulfed Victoria killing 173 people and reducing several towns to dust Franklin s book INFERNO THE DAY VICTORIA BURNED is the first to explore the horrors of the day that will forever be known as Black Saturday Not only does the author explain what happened that day individual heroism unimaginable tragedy tales of towns all but wiped off the map but also why it happened The author examines the roles of the Victorian government the CFA and the local councils that were so determined to protect roadside vegetation He analyses the pros and cons of preventive burning questions the merits of the state s controversial stay or go policy and delves into the mind of an arsonist Through it all there is a clear message failure was everywhere on Black Saturday With bushfires a constant threat in Australian life Franklin cites many important lessons that need to be learned if such a disaster is to be avoided in the future
