**Repositories for Print** Pentti Vattulainen, Steve O'Connor, 2018-03-05 Repositories for low use books have long existed for the larger cultural institutions across the globe Libraries have long been strong developers of off site storage This need has evolved for libraries because of their continuous collection of print materials as a record of the intellectual and cultural output of different cultures Libraries have had this role described neatly and executed as a clear professional role This new book will primarily examine two aspects of this role Firstly the organisational and technological responses to this evolving role will be explored and secondly the wide breadth of strategic responses to challenges of digital will be detailed In this authors to this edited volume will describe their work for libraries but increasingly for Galleries Archives and Museums The papers are drawn from Europe United Kingdom the United States and Australasia The organisational models discussed in the book provide clear illustration of imaginative responses to the plight of the individual institutional library New organisational models are shaping the way in which business can be done in times of change The pressures today on all cultural institutions are similar and so there is a new convergence of similar need and similar solutions This book is an acknowledgment that there are a wide variety of strategic organisational and technological responses to the retention of cultural objects whether they be books art records or other cultural objects It is illustrative of the power of good lateral thinking and planning by professionals of the power of international networks and of convergence in response to need The book will be an edited with a future perspective by Pentti Vattulainen and Steve O Connor who have had significant experience in this area internationally

Discoverability in Digital Repositories Liz Woolcott, Ali Shiri, 2023-04-04 While most discoverability evaluation studies in the Library and Information Science field discuss the intersection of discovery layers and library systems this book looks specifically at digital repositories examining discoverability from the lenses of system structure user searches and external discovery avenues Discoverability the ease with which information can be found by a user is the cornerstone of all successful digital information platforms Yet most digital repository practitioners and

researchers lack a holistic and comprehensive understanding of how and where discoverability happens This book brings together current understandings of user needs and behaviors and poses them alongside a deeper examination of digital repositories around the theme of discoverability It examines discoverability in digital repositories from both user and system perspectives by exploring how users access content including their search patterns and habits need for digital content effects of outreach or integration with Wikipedia and other web based tools and how systems support or prevent discoverability through the structure or quality of metadata system interfaces exposure to search engines or lack thereof and integration with library discovery tools Discoverability in Digital Repositories will be particularly useful to digital repository managers practitioners and researchers metadata librarians systems librarians and user studies usability and user experience librarians Additionally and perhaps most prominently this book is composed with the emerging practitioner in mind Instructors and students in Library and Information Science and Information Management programs will benefit from this book that specifically addresses discoverability in digital repository systems and services

**Blanket Toss Under Midnight Sun** Paul Seesequasis, 2019-10-22 A revelatory portrait of eight Indigenous communities from across North America shown through never before published archival photographs a gorgeous extension of Paul Seesequasis's popular social media project. In 2015 writer and journalist Paul Seesequasis found himself grappling with the devastating findings of Canada's Truth and Reconciliation Commission report on the residential school system. He sought understanding and inspiration in the stories of his mother herself a residential school survivor. Gradually Paul realized that another mostly untold history existed alongside the official one that of how Indigenous peoples and communities had held together during even the most difficult times. He embarked on a social media project to collect archival photos capturing everyday life in First Nations Metis and Inuit communities from the 1920s through the 1970s. As he scoured archives and libraries Paul uncovered a trove of candid images and began to post these on social media where they sparked an extraordinary reaction. Friends and relatives of the individuals in the photographs commented online and through this dialogue rich histories came to light for the first time. Blanket Toss Under Midnight Sun collects some of the most arresting images and stories from Paul's project. While many of the photographs live in public archives most have never been shown to the people in the communities they represent. As such Blanket Toss is not only an invaluable historical record it is a meaningful act of reclamation showing the ongoing resilience of Indigenous communities past present and future.
