Republic Book 2 Perseus:

The Engaged Historian Stefan Berger, 2019-04-01 On the surface historical scholarship might seem thoroughly incompatible with political engagement the ideal historian many imagine is a disinterested observer focused exclusively on the past In truth however political action and historical research have been deeply intertwined for as long as the historical profession has existed In this insightful collection practicing historians analyze reflect on and share their experiences of this complex relationship From the influence of historical scholarship on world political leaders to the present day participation of researchers in post conflict societies and the Occupy movement these studies afford distinctive humane and stimulating views on historical practice and practitioners

The Dialectical Path of Law Charles Lincoln, 2021-10-13 This book aims to contribute a single idea a new way to interpret legal decisions in any field of law and in any capacity of interpreting law through a theory called legal dialects This theory of the dialectical path of law uses the Hegelian dialectic which compares and contrasts two ideas showing how they are concurrently the same but separate without the original ideas losing their inherent and distinctive properties what in Hegelian terms is referred to as the sublation To demonstrate this theory Lincoln takes different aspects of international tax law and corporate law two fields that seem entirely contradictory and shows how they are similar without disregarding their key theoretical properties Primarily focusing on the technical rules of the Organisation for Economic Co operation and Development OECD approach to international tax law and the United States approach to tax law Lincoln shows that both engage in the Hegelian dialectical approach to law

Experience Music Experiment William Brooks, 2021-08-19 Truth happens to an idea So wrote William James in 1907 and twenty four years later John Dewey argued that artistic experience entailed a process of doing and undergoing But what do these ideas have to do with music or with research conducted in and through music that is with artistic research In this collection of essays fourteen very different authors respond with distinct and challenging perspectives Some report on their own experiments and experiences some offer probing analyses of noteworthy practices some view historical continuities through the lens of pragmatism and artistic experiment The resulting collection yields new insights into what musicians do how they experiment and what they experience insights that arise not from doctrine but from diverse voices seeking common ground in and through experimental discourse artistic research in and of itself

Marcus Furius Camillus Marc Hyden, 2023-09-30 This is the only modern biography of Marcus Furius Camillus currently available in English Camillus served as a censor was elected to six consular tribuneships appointed dictator five times and enjoyed four triumphs He toppled mighty Veii ejected the Senones from Rome following its sacking and helped orchestrate a grand compromise between the patricians and plebeians The Romans even considered him Rome s second founder a proud appellation for any Roman and revered him for being an exemplar of Roman virtue Interestingly he never held the consulship Plutarch stated that Camillus had avoided it on purpose and for good reason The office was often at the heart of controversy given that patricians dominated it for most of Camillus

life The appointment of a dictator was an emergency measure taken only in the direst of situations and the fact that Camillus was repeatedly appointed speaks of a period when the young Republic was surrounded by enemies and still fighting for survival Without Camillus efforts the city may never have fulfilled its great destiny Marc Hyden sifts the fragmentary and contradictory sources and while acknowledging that much legend and exaggeration quickly accrued around Camillus name presents the story of this remarkable life as the ancient Romans knew it

Superabundance Marian L. Tupy, Gale L. Pooley, 2022-08-31 Generations of people have been taught that population growth makes resources scarcer In 2021 for example one widely publicized report argued that The world s rapidly growing population is consuming the planet s natural resources at an alarming rate the world currently needs 1.6 Earths to satisfy the demand for natural resources a figure that could rise to 2 planets by 2030 But is that true After analyzing the prices of hundreds of commodities goods and services spanning two centuries Marian Tupy and Gale Pooley found that resources became more abundant as the population grew That was especially true when they looked at time prices which represent the length of time that people must work to buy something To their surprise the authors also found that resource abundance increased faster than the population a relationship that they call superabundance On average every additional human being created more value than he or she consumed This relationship between population growth and abundance is deeply counterintuitive yet it is true Why More people produce more ideas which lead to more inventions People then test those inventions in the marketplace to separate the useful from the useless At the end of that process of discovery people are left with innovations that overcome shortages spur economic growth and raise standards of living But large populations are not enough to sustain superabundance just think of the poverty in China and India before their respective economic reforms To innovate people must be allowed to think speak publish associate and disagree They must be allowed to save invest trade and profit In a word they must be free

Freedom of Virtue Tom Edwards, Cosimo Chiera, 2019-05-31 Come on a journey with two travellers not virtuous just trying to be Virtue is not for everyone and many people find their happiness in the green valleys of life But for those of us with a little chutzpah a summit looms high above and time is of the essence What makes a person no matter their background intelligence or resilience stand out from the crowd to display excellence in the art of living It was this question that led two friends a behavioural neuroscientist turned counsellor and a mathematician both experienced academics and educators to embark on a journey of discovery into the ingredients for human excellence The dish they found is called virtue Virtue sits in the background of daily life yet influences everything we say and do It is about a person's style and substance in spite of their physical strength or intellect Virtue is for us all not only for the strong and the smart So how do we attain a life of excellence amidst a modern world that has provided so many technical advances yet in which we still suffer so much anxiety depression obesity and conflict The authors argue our need to always feel comfortable if not happy has robbed us of achieving excellence in our own lives Taking an evidence based approach they examine research findings from positive psychology anthropology and biology and delve into the tenets of religion and philosophy to identify six virtues which are foundational to our humanity and which orientate each of us to our best lived life Cutting across cultural and religious barriers this unique book provides readers with practical tools in the daily art of living useful to parents teachers mental health professionals community workers and business leaders Create your own clear path to a life of excellence through virtue The Hamburg Dramaturgy

by G.E. Lessing Natalya Baldyga, 2018-10-26 While eighteenth century playwright and critic Gotthold Ephraim Lessing made numerous contributions in his lifetime to the theater the text that best documents his dynamic and shifting views on dramatic theory is also that which continues to resonate with later generations the Hamburg Dramaturgy Hamburgische Dramaturgie 1767-69 This collection of 104 short essays represents one of the eighteenth century's most important critical engagements with the theater and its potential to promote humanistic discourse Lessing's essays are an immensely erudite deeply engaged witty ironic and occasionally scathing investigation of European theatrical culture bolstered by deep analysis of Aristotelian dramatic theory and utopian visions of theater as a vehicle for human connection This is the first complete English translation of Lessing's text with extensive annotations that place the work in its historical context For the first time English

language readers can trace primary source references and link Lessing's observations on drama theory and performance not only to the plays he discusses but also to dramatic criticism and acting theory This volume also includes three introductory essays that situate Lessing's work both within his historical time period and in terms of his influence on Enlightenment and post-Enlightenment theater and criticism The newly translated Hamburg Dramaturgy will speak to dramatists, directors, and humanities scholars who see theater not only for entertainment but also for philosophical and political debate **The Road**

come at the cost of dwindling solidarity cohesion and social order This has left us with more choices in every realm of life but less security stability and national unity Both our strengths and our weaknesses are therefore consequences of these changes And the dysfunctions of our fragmented national life will need to be answered by the strengths of our decentralized diverse dynamic nation Levin argues that this calls for a modernizing politics that avoids both radical individualism and a centralizing statism and instead revives the middle layers of society families and communities schools and churches charities and associations local governments and markets Through them we can achieve not a single solution to the problems of our age but multiple and tailored answers fitted to the daunting range of challenges we face and suited to enable an American revival

The Roman Republic, History, Myths, Politics, and Novelistic Historiography Miguel A. Faria, Jr., 2025-06-09 The history of the Roman Republic has been shrouded in myth assailed by gaps in historical knowledge and even immersed in political biases But in this book the author has succeeded in penetrating the mist using both ancient and modern sources as well as numismatic information and other illustrative materials and artforms He narrates the history of ancient Rome from its beginnings with the legendary seven kings of Rome the founding and struggles of the Republic the wars of conquests and civil wars to the collapse of the Republic and the inception of the Roman Empire with Augustus Peace is finally established and the Augustan Renaissance and the Pax Romana followed hinting at the course of Western civilization One lesson is learned Liberty and civic duties are too valuable to be forsaken for the material safety of bread and circuses because in the end citizens so partaking may end up with neither liberty nor safety

Ideological Fantasies in Planning Theories and

Practices Elham Bahmanteymouri, Jean Hillier, Mohsen Mohammadzadeh, 2025-12-15 This edited volume challenges the hegemonic ideologies that underpin contemporary planning thought and practice building on and extending the pioneering work of Michael Gunder. Through the lens of fantasy particularly as theorised in Lacanian psychoanalysis contributors interrogate how planners' desires, decisions and subjectivities are shaped by ideological narratives that sustain dominant neoliberal structures. The book includes Michael Gunder's influential work on ideological fantasy alongside eleven original chapters that collectively deconstruct, traverse and reimagine ideological constructs in planning. The volume is organised into three thematic sections. The first section critically deconstructs capitalist ideological fantasies embedded in planning, education, urban imaginaries, participatory governance and neoliberal policy discourses. The second section explores how fantasies operate within environmental governance, housing activism such as YIMBYism, flat ontologies and community strategies while also identifying possibilities for alternative discourses. The final section presents counter-hegemonic perspectives from non-Western contexts including critiques of China's Territorial Spatial Planning and Iranian philosophical traditions of truth-telling as ethical governance. Contributors include established and emerging scholars from diverse global contexts offering interdisciplinary insights for researchers and practitioners in planning, geography, sociology, philosophy and political studies. This collection stands as both a scholarly tribute to Gunder's intellectual legacy and a call for critical transformative planning for futures.

Out of the Embers Bradley Jersak, 2022-11-22 Deconstruction. Trendy brand name for falling away from belief in God. Or a process essential to authentic faith. Liberation or trauma. Prison break or exile. It's complicated. Just like you. Christian history records a Great Reformation and a Great Awakening. But today's Great Deconstruction will surely leave an equally profound impact. In *Out of the Embers* Bradley Jersak explores the necessity, perils and possibilities of the Great Deconstruction: how it has the potential to either sabotage our communion with God or infuse it with the breath of life, the light and life of Christ himself. In this collection of vulnerable memoirs, philosophical memos and candid provocations Jersak resists both the hand-wringing urge to corral stray sheep and the exultant desire to play the happy clappy Ex-vangelical cheerleader. He employs the wisdom and expertise of the great deconstructionists: Christianity's ancient influences, Moses, Plato, Paul and the Patristics; beloved frenemies from Voltaire to Nietzsche and the masters of deconstruction, Dostoevsky, Kierkegaard and Weil, to double down and deconstruct deconstruction itself. Where is faith after deconstruction? The author's heart is to engage and empathize with the bereft and disoriented, stoking the brittle ashes for live embers. In this quest for the resilient gospel of the martyrs, the marginal and those outside the threshold, inexplicably in this liminal space, life stirs. A light shines through the ashes. We find, often for the first time, that living connection. Jersak calls presence in communion. There is a sea change occurring across the Western church and civilization. Whether we're watching a radical course correction or a complete collapse remains to be seen and how it pans out will likely depend on how we see what's happening, who we are becoming, how we live in response and most important, where we find Christ situated in this
