Public Policy is the subfield of Political Science concerned with examining the causes and consequences of governmental decisions. Historically, but not for sound epistemological reasons, "policy sciences," "policy studies," and "policy analysis" also refer to the intellectual activity of understanding how government works and what difference it makes. Because "public policy," in ordinary language, refers to the outputs of the policy-making process, I tend to prefer "policy analysis" to refer to the study of the policy-making process and substantive policy issues.

Policy analysis is the creation, distribution, and utilization of knowledge for and about the public policy-making process. Policy analysis, along with being a subfield of traditional political science, is a multidisciplinary field that involves the disciplines of economics, sociology, psychology, public administration, social work, law, agricultural sciences, etc. in understanding the policy process and in providing knowledge for decision-makers. **Policy analysis requires sound preparation in analytical methods, the politics of the policy process, and the complexities of a substantive policy area.**

The objectives of this seminar are:

1. To increase your knowledge of the American policy-making process;
2. To introduce you to the questions and controversies surrounding the field of policy analysis;
3. To relate policy analysis to traditional academic disciplines and to the policy-making process;
4. To examine the extent to which policy analysis is used in the policy process;
5. To examine the characteristics of "useful" policy research;
6. To consider briefly several current policy issues as examples of questions and challenges posed to policy analysts;
7. To introduce you to the economic approach to policy analysis; and
8. To introduce you to an approach assessing the performance of the American policy-making process.

This seminar provides an opportunity to polish your professional analytical, writing, and communication skills. If successful, this seminar will pose meaningful questions that you will consider as you go about your graduate education and undertake policy analysis.

Controlling Immigration James F. Hollifield, Philip L. Martin, Pia M. Orrenius, François Héran, 2022-09-27 The fourth edition of this classic work provides a systematic comparative assessment of the efforts of major immigrant receiving countries and the European Union to manage migration paying particular attention to the dilemmas of immigration control and immigrant integration Retaining its comprehensive coverage of nations built by immigrants the so called settler societies of the United States Canada Australia and New Zealand the new edition explores how former imperial powers France Britain and the Netherlands struggle to cope with the legacies of colonialism how social democracies like Germany and the Scandinavian countries balance the costs and benefits of migration while maintaining strong welfare states and how more recent countries of immigration in Southern Europe Italy Spain and Greece cope with new found diversity and the pressures of border control in a highly integrated European Union The fourth edition offers up to date analysis of the comparative politics of immigration and citizenship the rise of reactive populism and a new nativism and the challenge of managing migration and mobility in an age of pandemic exploring how countries cope with a surge in asylum seeking and the struggle to integrate large and culturally diverse foreign populations American Parties in Context Robert Harmel, Matthew Giebert, Kenneth Janda, 2016-04-14 Roughly sixty five years ago a group of political scientists operating as the Committee on Political Parties of the American Political Association thought long and hard about whether the American parties were adequately serving their democracy and made specific recommendations for improvements Comparing the parties of this country to those of Great Britain the Committee found the American parties to be lacking in such fundamentals as clear policy differences strong and effective organization and unity of purpose among each party s representatives in public offices Starting from that background this book is intended to significantly enhance students understanding of the American parties today by putting them in broader context How do the twenty first century Democrats and Republicans compare to the APSA Committee s responsible parties model of the mid twentieth And how do the American parties compare to parties of other democracies around the world including especially the British parties Harmel Giebert and Janda answer those questions and in the process demonstrate that the American parties have moved significantly in the direction of the responsible parties model but while showing little inclination for implementing the greater discipline the Committee thought essential Already having provided as much ideological choice as the British parties the US parties have now edged closer on the other critical

requirement of legislative cohesion The authors show that the latter has resulted naturally from the greater homogenization of the meaning of Democrat and Republican across the country both within the electorate and now within Congress as well The dramatic increase in cohesion is not the product of greater party discipline but rather of sectoral realignments

Inequality and the Fading of Redistributive Politics Keith Banting, John Myles, 2013-09 All advanced democracies have faced the pressures of globalization technological change and new family forms which have generated higher levels of inequality in market incomes But countries have responded differently reflecting differences in their domestic politics The politics of who gets what and why is at the core of this volume the first to examine this question in an explicitly Canadian context In *Inequality and the Fading of Redistributive Politics* leading political scientists sociologists and economists point to the failure of public policy to contain surging income inequality Government programs are no longer offsetting the growth in inequality generated by the market and Canadian society has become more unequal The redistributive state is fading due to powerful forces that have reshaped the politics of social policy including global economic pressures ideological change shifts in the influence of business and labour changes in the party system and the decline of equality seeking civil society organizations On one side the organizations that speak for the economic interests of lower income Canadians mobilizing resources expertise and attention on their behalf have been weakened On the other side changes in the distribution of power within our political institutions have made concerted action to tackle inequality more difficult This volume demonstrates conclusively that action and inaction policy change and policy drift are at the heart of growing inequality in Canada Governments have not responded energetically to the evidence and their indifference calls into question Canada's record as a kinder gentler nation
