

Use the information on this page to help you write the proposal on the template provided on page two. Please email me if you have any questions. Remember – college class assignments should be typed unless the instructor tells you otherwise.

Your proposal should be brief and to the point. Don't make it any more complicated than it really is. Relax and think about how this assignment will help you learn how to write better papers in the future. ☺

Research Paper Proposal

Date:

To: Professor Debbie Vallejo

From:

Subject of my paper: This is the broad topic your paper will fall under. Example – “Short Term Memory Loss” is a broad topic. The thesis statement will narrow down the discussion of your paper.

My Major and why writing this paper about this topic will be beneficial to me: This is a personal discussion about why you chose the topic and how this information will benefit you.

My thesis statement: Should be one or two sentences, and is a statement of your belief, not a question. Is a specific statement that says where you stand on the topic you are discussing. Example – Short term memory loss is a result of lack of retrieval, not a loss of information.

Approach to the subject of my paper: Try to envision a logical way in which to present your material. In what order will you present your material to best address the issues? Will you have to define any terms? If so, which ones? Will you show opposing viewpoints? Will you be comparing and contrasting? Will you be categorizing some information? Are there examples you can use from your sources to make the paper more interesting?

Intended audience: Who would be interested in reading your paper?

Documentation Style: MLA (Modern Language Association)

Kinds of sources I will use and why they will benefit my paper: You need to have at least three other sources outside of your textbook. Only one internet source allowed.

Writing in Psychology Scott A. Miller, 2022-06-16 The second edition of *Writing in Psychology* by Scott A. Miller is a comprehensive guide to addressing the most challenging issues that students face while writing about psychology, including what to say and how to say it. It offers practical tools to overcome the challenges and create an engaging work. The book is a valuable resource for helping readers become better writers of psychology with the aid of various helpful learning tools which provide detailed coverage of how to write empirical reviews, research proposals, literature reviews, term papers, and posters. It examines examples from journal articles that give readers a grasp of the content they will encounter in writing psychological reports. Furthermore, it includes exercises that provide an opportunity to apply the points conveyed in each chapter, examples of ways to avoid the most common mistakes made by students, and a guide to the best practices for improving one's writing. Readers will also develop a thorough understanding of how to write in an engaging yet accurate style using grammatical and word use rules that govern writing in general and the rules of the seventh edition APA American Psychological Association Publication Manual that determine the expression of that content. Throughout the book, it emphasizes inclusion, diversity, and fair treatment of those with whom psychologists deal in research and writing. The book will benefit anyone looking for guidance on how to write about psychological content. It is ideal for research scholars and psychology students as a primary text for writing in psychology courses and a supplement for graduate or advanced undergraduate courses in research design or research methods.

The Counselling and Psychotherapy Research Handbook Andreas Vossler, Naomi Moller, 2014-10-16 Research is a vital and often daunting component of many counselling and psychotherapy courses. As well as completing their own research projects, trainees across modalities must understand the research in the field, what it tells them, and how to do it. Breaking down this seemingly mountainous task into easy-to-swallow pieces, this book will navigate your students through each stage of the research process, from choosing a research question through the pros and cons of different methods to data analysis and writing up their findings. Written by leading contributors from the field, including John McLeod, Mick Cooper, and Tim Bond, each chapter features points for reflection, engaging activities, and suggestions for further reading, helping students to engage with all aspects of research. An original graphic narrative runs throughout the book, bringing this complex topic to life in a unique way. Whether embarking on research for the first time or already a little familiar with research and research methods, this unique guide is something counselling and psychotherapy
