

Research Proposal Guidelines

Purpose

The purpose of developing a research proposal is to exercise what you have learned in class and apply your knowledge to a clinical problem in which you have an interest. A research proposal has a specific format depending upon your audience that will be reading it or the funding agency requirements. You will use the format listed in the Design section.

Procedure

Identify a clinical problem of interest to you and develop a research project proposal. Use the specific format below. The paper must follow APA, 5th edition format style and be less than 25 pages (including tables and/or figures and the references). You may want to identify a problem early in class and use the discussion time to help formulate the research question.

Design

The following format is to be used. It is recommended to use two or three level headings (see your APA manual for assistance). Your main headings are listed below.

- **Specific Aims**

List the broad, long-term objectives and what the specific research proposed is intended to accomplish.

- **Background and Significance**

Briefly sketch the background leading to the present study, critically evaluate the existing knowledge, and specifically identify the gaps that the study is intended to fill. State concisely the importance and social work health relevance of the research described. What makes this research project significant as it relates to your specific aims?

- **Research Design/Methods**

Describe the research design and the procedures to be used to accomplish the specific aims. Include how the data will be collected, analyzed, and interpreted. Describe any new methodology and its advantage over existing methodologies. Discuss the potential difficulties and limitations of the proposed procedures and alternative approaches to achieve the aims. As a part of this section, provide a tentative timetable. You may want to divide this section into subsections to keep your proposal clear and easy to follow.

- **Human Subjects Protection**

- **Risks to the subjects.** Describe the proposed involvement of human subjects in the work outlined. Describe the characteristics of the subject population, including their anticipated number, age range. List inclusion and exclusion criteria.

- **Sources of Material.** Identify the sources of research material obtained from individually identifiable living human subjects in the form of specimens, records, or data. Indicate whether the material or data will be obtained specifically for research purposes.
