

DISSERTATION LITERATURE REVIEW

CHAPTER 2: Literature Review

Introduction

While extensive public and clinical research on CHD exists, scholarly information on the public policy system mechanisms, which help in creating awareness and preventing CHD in AAM, is non-existent. The problem revolves around the fact that even though earlier investigators have indicated a rise in CHD awareness among AAW, highest numbers of deaths attributed to the silent killer are reported in AAM (CDC, 2011). Because of this, the literature review will explore factors that contribute to the CHD epidemic affecting AAM from the socio-ecological perspective. Secondly, the negative health effects emanating from the cultural values and beliefs, socio-economic status, and environmental conditions that affect AAM's health jointly will be evaluated. Finally, a discussion of findings from previous literature examining the correlation between how AAM perceive health and its effect on attitude and behavior towards lifestyle choices and health are presented.

Public policy within the literature may be considered understandings, informal or formal rules, regulations, and laws, which are employed collectively for directing collective and individual behaviors among people (Schmid, Pratt, & Howze, 1995). The literature review is aimed at examining past literature from the socio-ecological viewpoint to provide an insight into how the health status of AAMs have been affected by cultural beliefs, socioeconomic status, and environmental conditions.

Literature and Learning Stefan Collini, 2025-03-05

The study and teaching of English literature is generally regarded as one of the central disciplines in the modern university, yet for much of its history it struggled to gain academic legitimacy and was frequently derided as a soft option. Its early professors responded by emphasizing its scholarly character, foregrounding philology and literary history in ways that marked the syllabus far into the twentieth century. Stefan Collini provides here the first full account of the discipline's development from its late eighteenth-century beginnings up to the early 1960s. Paying special attention to institutional settings, he challenges numerous assumptions about the character of universities in the nineteenth and early twentieth centuries. From the detailed exploration of syllabuses, exam papers, and other institutional records, the impact of literary criticism is revealed to be later and more

partial than is commonly assumed Rather than seeing the early teaching of English literature as a substitute for religion or a means to soften class conflict Collini emphasizes the role of ideals of learnedness and scholarship as well as of external factors such as opportunities for employment in the civil service and secondary school teaching There are full discussions of the parts played by such figures as John Churton Collins A C Bradley George Saintsbury and Walter Raleigh together with sceptical analyses of the decisive significance usually attributed to Matthew Arnold T S Eliot I A Richards and F R Leavis Separate chapters are devoted to neglected aspects of the story such as the role of Classics the importance of the subject for women s higher education and the connections with English teaching in schools Drawing on extensive use of institutional archives and records as well as the writings of contemporary participants the book offers a vivid and wide ranging history of English as discipline and its centrality across academic literary cultural and educational life over the past two hundred years as well as a resounding testament to its continued importance and relevance today **Literature, Theory and the**

University, 1913 *Annual Catalogue of Baylor University at Waco, Texas* Baylor University, 1913 *The Variation Theory of Comparative Literature* Shunqing Cao, 2014-03-21 Seeing the restrictions of former studies in Comparative Literature and aiming to amend these deficiencies the author of this book mainly discusses the major theoretical significance and academic value of the Variation Theory in the whole process of the development of Comparative Literature in the world In China the seminal comparative study of literature among different cultures can be dated back to ancient China while the founding of comparative literature as a distinct academic discipline has to be largely owing to the influence of the West The modern Chinese study of comparative literature formed its uniqueness under Western influence The direct influence of the translation of western theories into China is remarkable However in the course of translation and reception of Western theories Chinese comparatists and intellectuals have been encountering various problems and solving them with an alternative method accordingly different from the traditional methods proposed by the French School and the American School Therefore in this book modern Chinese study of comparative literature is put in a historical context with regard to the theoretical issue of the discipline in China through the entire 20th century At present many scholars in China and in other

countries agree that with the influence study proposed by the French School and the study of analogy advocated by the American School the entire theoretical system of Comparative Literature is well built. However, when the comparative study of literature between East and West is concerned, the theory of Comparative Literature is far from perfect. It is not only because many problems still exist, but there are significant defects in their theoretical bases respectively. Many researches have proven that even with the influence study and the study of analogy, we still cannot solve many problems in the practice of studies in comparative literature. This does not mean that we have no respect for the contributions of the French School and the American School; we just want to attach importance to literary variations, which is a phenomenon that has long been neglected. The purpose of putting forward the Variation Theory in Comparative Literature is to provide new perspectives, new methods, and new theory to the study of comparative literature, which may be a major breakthrough in the international arena of Comparative Literature. The neglect of literary variation is mainly because all the previous theories about comparative literature start off in search of similarities but not differences. Accordingly, in the 1990s, heterogeneity as a premise of comparability was put forward. And later, the variation theory was further advanced. It is not only an important phenomenon in literary communication but also the most valuable research object in Comparative Literature. Still, it will be an important path to cultural innovation. The Variation Theory may make up the major flaws of theories by both the French school and the American School since it focuses on heterogeneity and variability in cross-cultural literary events, especially the ones of intercultural civilization, which will be a new course for comparative literature. Throughout the history of literature and the history of literary communication, collisions between different civilizations have always been producing new literary events, which make the heterogeneity of different civilizations and variability traceable. The higher stage of literary communication may mean dialogue and blend between different cultures. The overarching concerns of this book include different levels of variation in literary communication and the studies of different objects. The introduction begins with a literature review of major achievements made by the French School and the American School, with pointing out what they have neglected. The body of the book is divided into three parts. In the first part, Chapter 1 deals with the major contributions of influence study and its weaknesses. The origination of comparative literature in most of European countries is reviewed first, and then the major contributions of the French School are listed to point out its merits and weaknesses. The author discusses the relation between Influence Study and the Variation Theory, and the importance of the French school in the theoretical development of comparative literature is stressed too. Chapter 2 offers a critical introduction and reflection on the study of analogy. Both its major contributions and weaknesses are made clear to further illustrate the relationship between interpretation and the Variation Theory. And the discursive variation is discussed. Part II is a transitional part with only one chapter that gives a clear account of the phenomenon of variation from an international perspective. Part III consists of four chapters. Chapter 4 offers a detailed description of The Variation Theory in a cross-languages context. Chapter 5 deals with cross-cultural variation in

homogeneous circle of civilization Chapter 6 discusses the variation among heterogeneous civilization For a long period of time the theoretical study of comparative literature in China has largely been confined to the Chinese academic arena thus has long been neglected On one hand western comparatists have gradually realized the importance of a non western perspective in the study of the discipline on the other hand few books are available to introduce the recent development of comparative literature study in China Compared with the enthusiastic reception of the theories of the French School and the American School the theories of Chinese comparatists receives relatively little attention in western countries In this sense the proposed book attempts to challenge the myth of monolithic theories of comparative literature trying to construct an alternative theory of the discipline

The Reception of Charles Dickens in Europe Michael Hollington, 2013-08-29 The Reception of Charles Dickens in Europe offers a full historical survey of Dickens s reception in all the major European countries and many of the smaller ones filling a major gap in Dickens scholarship which has by and large neglected Dickens s fortunes in Europe and his impact on major European authors and movements Essays by leading international critics and translators give full attention to cultural changes and fashions such as the decline of Dickens s fortunes at the end of the nineteenth century in the period of Naturalism and Aestheticism and the subsequent upswing in the period of Modernism in part as a consequence of the rise of film in the era of Chaplin and Eisenstein It will also offer accounts of Dickens s reception in periods of political upheaval and revolution such as during the communist era in Eastern Europe or under fascism in Germany and Italy in particular
