

Types of data				Types of data (cont)				Stages of research		
Primary data	Data collected by the researcher themselves i.e. experiments / surveys / observations.	- Relevant information - Can Control methodology	- Time Consuming - Can be costly dependant on the methods used	Qualitative data	Type of data that is focused around opinion, feelings and why something is happening. Complex data and harder to analyse. Subjective Data.	- Detailed information that explores reasonings- Based on human experience which gives better validity	- Longer process to analyse the data as it all varies due to subjective nature if not careful- researcher can have a negative impact on the results - behaviour	1. Choice of topic	Deciding whether the research will focus on • social problems • sociological problems	They need to know what they're studying
Secondary data	Data collected by other people & organisations	- Already gathered so quicker - Usually cheaper to access	- Information may be old and inaccurate - Questionable whether it can be applied	Positivism vs Interpretivism POSITIVISM - Theory approach based on natural and factual causes - Idea surrounds objectivity and positivists want statistical, quantitative data that reveals the truth. Preferred research methods: Quantitative, Official Statistics, Social Surveys, / Unstructured Interviews / Questionnaires INTERPRETIVISM - Approach which tries to see explanations from subjects perspective. They want Verstehen (Meaning) and qualitative data with reasons as to why something happened. Preferred research methods: Qualitative, Personal Documents, Participant Observation, Unstructured Interviews				2. Aim	Considering the main research goal in their study	It is important to have a research goal
Quantitative data	Numerical, statistical information that is objective. Answers factual questions instead of giving reasonings.	- Best for representativeness and generalisability - Broader study - greater number of subjects	- Harder to analyse and give reasonings - Can't explore why					3. Operationalise research values	Breaking down the hypothesis or aim into concrete values that can be measured	Precise measurement of social phenomena cannot occur without it and it allows others to replicate your research
								4. Choose target population	Choosing people with the characteristics you want to research	It is important to have a defined research population
								Stages of research (cont)		
								5. Choose sampling method	Choosing between random and non-random sampling	The sampling method is crucial to ensure the sample is generalisable

Essentials of Qualitatively-Driven Mixed-Method Designs Janice M. Morse, 2016-07-15 In a mixed method tradition that privileges the quantitative leading qualitative researcher Janice Morse breaks new ground by arguing the importance of research designs for which the primary component is qualitative and contains either a quantitative or a qualitative supplemental strategy Using a variety of examples and visual prompts Morse convincingly demonstrates that such designs allow novice researchers to obtain answers more quickly and with more certainty Her book provides clear and concise explanations making even complex research designs understandable to the beginning researcher argues for the importance of primary qualitative designs due to their theoretical strength stresses the importance of using goal directed actions and analyses that do not violate the assumptions of either qualitative or quantitative inquiry

User Journey Mapping Stephanie Walter, 2022-02-25

A user journey map is a powerful asset that is used to understand how people use our products. It is an essential tool for building websites, applications, and services. By visualizing user goals, phases in the journey, tasks, pain points, and sometimes feelings, a map can help teams build products by showing a global view of the user's journey, bringing stakeholders and product teams together. It can be used to brainstorm new opportunities, fix issues, design new services, and understand gaps within an organization. This book will show you how to research, present, and use a user journey map. You'll learn what a user journey map is and what it's useful for. The different types of maps and how to use them. How to conduct user research for mapping. How to run workshops. How to use your maps effectively.

Real Research Liahna Gordon, 2015-02-24. *Real Research: Research Methods Sociology Students Can Use* by Liahna Gordon is an innovative text that takes a holistic approach to the subject by discussing each step in the research process within the context of a particular method. After an opening chapter that surveys different methods of data collection and the components of research, students proceed immediately to chapters on specific methods. Each of these chapters begins with a description of the method and the logic that underlies it so that students can see how each step in the research process fits within the logic of that particular method. The chapters then go on to present all of the steps of research as they relate to that particular research method, from writing research questions through analysis. With this format, instructors can begin engaging students in hands-on exercises almost immediately, increasing interest in and comprehension of the material.
