

ECONOMIC IMPLICATIONS OF IMMIGRATION

Introduction

To underscore the significance of immigration reform, one has to first acknowledge the significance of its history to understand why it has to be reformed. The liberalization of immigration policy reflected in President Lyndon B. Johnson's 1965 legislation can be understood as part of the evolutionary trend in federal policy after World War II to end legal discrimination based on race and ethnicity (Center for Immigration Studies, 1995). Essentially, the immigration bill was mainly seen as an extension of the civil rights movement (Center for Immigration Studies, 1995). At that time, legal discrimination against any specific individual or group of individuals was seen as unconstitutional. Prior to the liberalization, there were strict limitations on an immigrant's entry into the United States. Under the old system first instituted in 1921, admission largely depended on an immigrant's country of birth, family reunification and needed skills (Center for Immigration Studies, 1995). Seventy percent of all immigrant slots were allotted to natives of just 3 countries-the United Kingdom, Ireland, and Germany-and went mostly unused, while there were long waiting lists for the small number of visas available to those born in Italy, Greece, Poland, Portugal, and elsewhere in eastern and southern Europe (Center for Immigration Studies, 1995). In any case, the new system virtually eliminated the various national origins quota system putting people of all nations on an equal footing for immigration to the U.S. (Center for Immigration Studies, 1995). Thus, this new legislation created the foundation of current immigration law which as a result, commenced a new era of mass immigration (Center for Immigration Studies, 1995). Furthermore, this new, augmented immigration flow came from countries in Asia and Latin America ushering in millions of both legal and illegal immigrants to the U.S.

The Handbook of International Migration Charles Hirschman, Philip Kasinitz, Josh Dewind, 1999-11-04 The historic rise in international migration over the past thirty years has brought a tide of new immigrants to the United States from Asia South America and other parts of the globe Their arrival has reverberated throughout American society prompting an outpouring of scholarship on the causes and consequences of the new migrations The Handbook of International Migration gathers the best of this scholarship in one volume to present a comprehensive overview of the state of immigration research in this country bringing coherence and fresh insight to this fast growing field The contributors to The Handbook of International Migration a virtual who's who of immigration scholars draw upon the best social science theory and demographic research to examine the effects and implications of immigration in the United States The dramatic shift in the national background of today's immigrants away from primarily European roots has led many researchers to rethink traditional theories of assimilation and has called into question the usefulness of making historical comparisons between today's immigrants and those of previous generations Part I of the Handbook examines current theories of international migration including the forces that motivate people to migrate often at great financial and personal cost Part II focuses on how immigrants are changed after their arrival addressing such issues as adaptation assimilation pluralism and socioeconomic mobility Finally Part III looks at the social economic and political effects of the surge of new immigrants on American society Here the Handbook explores how the complex politics of immigration have become intertwined with economic perceptions and realities racial and ethnic divisions and international relations A landmark compendium of richly nuanced investigations The Handbook of International Migration will be the major reference work on recent immigration to this country and will enhance the development of a truly interdisciplinary field of international migration studies

United States. Commission on Agricultural Workers, 1993 *High-skilled Migration* Mathias Czaika, 2018 Political and scientific debates on migration policies have mostly focused on governments efforts to control or reduce low skilled asylum and irregular migration or to encourage the return migration of these categories Less research and constructive discourse has been conducted on the role and effectiveness of policies to attract or retain high skilled workers An improved understanding of the drivers and dynamics of high skilled migration is essential for effective policy making as most highly developed and emerging economies experience growing shortages of high skilled labour supply in certain occupations and sectors and skilled immigration is often viewed as one way of addressing these Simplistic assumptions that high skilled migrants are primarily in pursuit of higher wages raise the expectation that policies which open channels for high skilled immigration are generally successful Although many countries have introduced policies aimed at attracting and facilitating the recruitment of high skilled workers not all recruitment efforts have had the desired effects and anecdotal evidence on the effectiveness of these programmes is rather mixed The reason is that the rather narrow focus on migration policy coincides with a lack of systematic and rigorous consideration of other economic social and political drivers of migration which may be equally or sometimes even more important than migration policies per se A better understanding of migration policies their making consequences and limitations requires a systematic knowledge of the broader economic social and political structures and their interaction in both origin and destination countries This book enhances this vibrant field of social scientific enquiry by providing a systematic multidisciplinary and global analysis of policies driving international high skilled migration processes in their interaction with other migration drivers at the individual city national and international level
