INTRODUCTION:

The outcome of professional education should be appropriate to the development of skills and not mere acquisition of knowledge. Medical education has called for a shift from acquisition of biomedical knowledge to the development of professional skills. The current curriculum emphasis is on "what the student must be able to do" than "what the student must know".

A skill could be defined as a refined pattern of movement or performance based upon and integrated with the perceived demands of a situation. A professional skill is not fixed and inflexible action but is an adaptive and flexible action tailored to the demands of a situation. In simple terms, a skill is the ability to act appropriately in response to a situation. A Skill could be classified into three main Domains: (1) Intellectual or Cognitive Skills (2) Psychomotor or Practical Skills (3) Affective or Communication Skills.

The Education process consists of setting educational objectives, providing teaching - learning experiences and evaluating the attainment of educational objectives. A variety of teaching - learning experiences are used to achieve educational objectives of different Domains and this necessitates use of different teaching - learning methods and media. A teaching - learning method is a planned way of providing a teaching - learning experience. Teaching - learning media (T-L media) are the means of communicating educational information. T-L media usually form components of teaching - learning methods.

Hence the study aims to assess the effectiveness of using different Teaching - Learning Methods and Media in the improvement in each of the Cognitive, Psychomotor and Affective Skills among medical students.

Material and Methods:

The study was conducted in Department of Community Medicine, Katuri Medical College and Hospital, Guntur. 6th semester Community Medicine clinical batch was taken for study. It was before and

after marks assigned for a short case clinical examination was 25. The students were asked to take a brief history, and do a relevant clinical examination on the patient. All these activities were observed by the examiner. The total marks were subdivided into various skill wise distribution: cognitive domain 10 marks psychomotor domain 10 marks and affective domain 5 marks, respectively. Now the same batch is taught using blend of Different Teaching - Learning Methods and Media - a combination of lecture with BMDQ videos, photograph, exercise, role play and group discussions of an accompanying Microsoft PowerPoint slideshow". Now again the batch was tested for various skills in the same format. Marks obtained were recorded, and analysis of data was done.

Data was entered in Microsoft Excel and analysed using Epi info Software. Appropriate tests of significance were used whenever necessary.

Results:

The study was conducted in Katuri Medical College and Hospital, Guntur. 6th semester Community Medicine clinical batch was taken for study.
