

## Photography Research Paper

Marine Photographer:

Hi there, thanks for the kind words happy to help. How long have you been into photography? Since 1990, I've always been interested in photography since the age of 10 and when I took up diving there was no question that I would be taking a camera in the water to bring back the amazing scenes and show people my discoveries. How did you get your start in photography? As a youngster I always had the idea I would like to draw and was complete crap! I picked up a camera one day and realized I could express my artistic self through a camera.

I've never looked back. I remember the first time someone referred to me as an artist as being very significant. What are your key interests within the business? Although I am not a professional my work has been published, and I have worked intermittently on professional projects on land and underwater. I associate with a quite a few professionals. I am always interested to see what sells in the market. You'd be surprised by what sells, opposed to what people like to hang on their walls. Pricing yourself in the market is important. Many pros complain people give their images away and devalue the market.

I am always interested in what companies are willing to pay for. I often consult with professionals before I sell images to magazines. Where do you do most of your work? The majority of my work is done in UK waters. I live and work in the UK so it makes sense to take advantage of all the area has to offer. I do work overseas periodically, but I prefer cooler climates. One goal I have is to dive under sea ice in the Arctic, or Antarctic. What do you enjoy most about this type of photography? Being underwater is like no other environment, there's no distraction with mobile phones, and people talking.

I like the challenge of being able to dive in harsh environments and show people the beauty, especially in the UK, as many feel it's often dark and gloomy and there's no colour. What is the most important thing to remember to get a good image? The single most important element in getting a good underwater picture is to get close to your subject, generally a maximum of three feet for most subjects, sometimes inches away. It depends on the size of the subject you are shooting. Obviously a 30 foot basking shark is different than a one inch shrimp.

The other thing is all about understanding light, whether you are using artificial light, or natural light, or balancing the two. The next thing to consider is the background and whether the subject is accessible or not. We try very hard as underwater photographers to not damage the environment for the sake of a picture. What is your favorite photograph of your own and why? I don't have one particular favourite. This changes all the time as the obsession to keep creating new material. I like the close up pictures of Lemon sharks I have done in black and white. There are so many others, hard to say really.
