

Paper #4 - The Research Paper

The research paper is very similar to the other papers you've written this semester in that it combines those analytic elements you've already used (such as in close readings/explications/thematic analysis) with research to produce an in-depth examination of a work or works in seven to nine pages. The research paper is the culmination of your semester of writing papers. Because of this, your research paper is worth a total of 25 percent of your grade (five percent of your total grade is your annotated bibliography; 20 percent of your total grade is your paper). For this paper, you will be asked to find a work or related works that we've read in class and find a question that the text provokes. Afterwards, research your topic and answer your question within your paper. Remember that asking yourself a question is important; Booth, Colomb, and Williams state in *The Craft of Research*, "If a writer asks no *question* worth pondering, he can offer no focused answer worth reading" (45).

Research topics should be appropriately narrow so that you may actually solve your question within seven to nine pages. Topics should be narrow enough to be fresh ideas, or ideas that hopefully no one has written about before. As Booth, Colomb, and Williams state, "A research topic is an interest defined narrowly enough for you to imagine becoming a local expert on it" (41).

Pick a work or a couple of works that we've read that you're interested in, but make sure you have a strong interest in it (or them). Think of a question that your work (or works) provokes, which can serve for your topic. Then narrow your topic. Research your topic with credible sources. And last, write your paper and cite your sources properly. Research papers are the simplest to define.

Writing and Publishing Science Research Papers in English Karen Englander, 2013-10-11 This book provides a comprehensive review of the current knowledge on writing and publishing scientific research papers and the social contexts. It deals with both English and non Anglophone science writers and presents a global perspective and an international focus. The book collects and synthesizes research from a range of disciplines including applied linguistics, the sociology of science, sociolinguistics, bibliometrics, composition studies and science education. This multidisciplinary approach helps the reader gain a solid understanding of the subject. Divided into three parts, the book considers the context of scientific papers, the text itself and the people involved. It explains how the typical sections of scientific papers are structured. Standard English scientific writing style is also compared with science papers written in other languages. Resources in Education, 2001-10 **Theme and Thematic Progression in Chinese College Students' English Essays** Jing Wei, 2015-12-17 This book focuses on how instruction affects English learners' use of Theme and thematic progression, thematic organization. While thematic organization in learner English has been extensively studied, little research has been done to investigate the effects of instruction on the use of Theme and thematic progression. Adopting a Systemic Functional Grammar approach, this study explores how a ten-week instruction on thematic organization affects Chinese college students' use of Theme and thematic progression by comparing their English essays before and after the instruction with native speaker essays as the research baseline. Second language acquisition researchers, curriculum developers and foreign language teachers will find this book useful as it not only presents a clear and detailed report of how Chinese college students learn to make better thematic choices but also provides a well-developed instructional package on Theme and thematic progression.

Thesis and Dissertation Writing in a Second Language Brian Paltridge, Sue Starfield, 2007-06-11 The relationship of supervisor to student has traditionally been seen as one of apprenticeship in which much learning is tacit with the expectation that the student will become much like the tutor. The changing demographics of higher education in conjunction with imperatives of greater accountability and support for research students have rendered this scenario both less likely and less desirable and unfortunately many supervisors are challenged by the task of guiding non-native speaker students to completion. This handbook is the ideal guide for all supervisors working with undergraduate and postgraduate non-native speaker students writing a thesis or dissertation in English as it explicitly unpacks thesis writing using language that is accessible to research supervisors from any discipline.

The Pivotal Role of Academic Librarians in Digital Learning Melissa N. Mallon, 2017-10-27 The budget-constrained, rapidly evolving climate of higher education and academic libraries makes it a necessity for academic librarians and administrators to communicate the value of their library to the university. This book explains how to execute this critical task. Authored by a library director and director of library liaison and instructional services who formerly served as a faculty member, a librarian and a professional development instructor, the

Pivotal Role of Academic Librarians in Digital Learning establishes the library's role in supporting student learning in an increasingly digital environment by exploring theoretical foundations and sharing concrete examples. The chapters focus on strategies and methods for demonstrating the academic library's value through strategic campus partnerships, creation of learning objects such as video tutorials, research instruction designed to facilitate student collaboration and participation in assessment of learning on campus. All of the topics addressed within a broad range of subject matter fall within the scope of learning in the digital age with particular emphasis on utilizing online learning environments including social media to teach students critical thinking and research skills as well as to position the academic library as an integral part of the modern learning environment. This book is a must read for academic librarians in instructional roles, teaching faculty, academic library administrators and managers who need to communicate the value of the library in relation to student learning and academic administrators who are obligated to demonstrate the important role of libraries in academic excellence. **Achieving and**
