

Parenting Styles Research Topics

A **parenting style** is a complex of methods and techniques which are used by parents in the process of the bringing up of their children. There are many approaches to the children's bringing up and each of them has the right for existence. The question of the parental style has always disturbed people, because the problem of bringing up is the most difficult and controversial one.

Essay Example on Research Topics On Parenting Styles

There are two main approaches which are based on the psychological and pedagogical practice: the active control of parents and the influence of the environment on the development of a child. For example, parents can control the child all the time and show what and how to do; or they can simply observe his development and promote him in the process of the achievement of his life experience.

A child can develop itself and learn the world around it accumulation the life experience and knowledge about the world. On the basis of these two approaches three styles of parenting appeared. The first one is called authoritarian and is based on the complete control of the child's life by its parents. Parents control every step and action of their child and inform them how to do every action correctly. Indulgent parenting style is the opposite way of bringing up children and is based on the complete freedom for a child. Children can do whatever and whenever they like and nobody prevents them to do all they want. As a result children are independent but it is impossible to control them in future, as they have got used to receive all they wish. The last parenting style is the authoritative style which stands in the middle of the previous ones: parents facilitate their child, set the rules and demands but never overload the child with them.

A well-organized parenting styles research proposal should be based on the hard work and detailed research of the topic. If the student has investigated the problem well and has got new effective ideas which will suit to the topic of parenting styles, his proposal will probably be accepted. Moreover, the paper should be convincing, urgent, interesting and logical. One should present methodology and literature review sections to persuade the professor that the topic is worth attention.

The problem of convincing paper writing is quite difficult for students who are lack of the writing experience. In order to see how a successful paper looks like one should read a well-analyzed free example research proposal on parenting styles prepared by the professional writer in the Internet. Every student should pay attention to the free sample research proposals on parenting styles if he wants to complete an interesting, logical and well-formatted paper which will suit the general writing requirements.
