Reshoring Manufacturing Is Coming Home Lean:

Reshoring Ade Asefeso MCIPS MBA,2014-08-14 Reshoring is essentially the opposite of offshoring it is a term used to describe the act of bringing back offshored manufacturing to a country In the beginning of 2011 for the most part most people thought that this was just impossible that there would be no reshoring to the U S or UK that everything was going to China manufacturing was leaving both countries and it will never come back and I think the striking thing is how much that s changed in the last three years You went to China because it was just so cheap you couldn t help it but if you ve got the engineers and people in the U S or UK and the customer base in the U S or UK you d like to be close to the customer It gives you a shorter supply chain *Faster, Better, Cheaper in the History of Manufacturing* Christoph Roser,2016-10-04 The industrial revolution mechanization water and steam power computers and automation have given an enormous boost to manufacturing productivity *Faster Better Cheaper in the History of Manufacturing* shows how the ability to make products faster better and cheaper has evolved from the stone age to modern times It explains how different developments over time have raised efficiency and allowed the production of more and better products with less effort and materials and hence faster better and cheaper In addition it describes the stories of inventors entrepreneurs and industrialists and looks at the intersection between technology society machines materials management and most of all humans *Faster Better Cheaper in the History of Manufacturing* follows this development throughout the ages This book covers not only the technical aspects mechanization power sources new materials interchangeable parts electricity automation but organizational innovations division of labor Fordism Talyorism Lean Most of all it is a story of the people that invented manufactured and marketed the products The book shows how different developments over time raised efficiency and allowed production of more with less effort and materials which brought us a large part of the wealth and prosperity we enjoy today The stories of real inventors and industrialists are told which includes not only their successes but also their problems and failures The effect of good or bad management on manufacturing is a recurring theme in many chapters as is the fight for intellectual property through thrilling tales of espionage This is a story of successes and failures It is not only about technology but also about social aspects Ultimately it is not a book about machines but about people **Creating Shared Value as Future Factor of Competition** Benedikt von Liel,2016-05-13 Benedikt von Liel provides a theoretical and empirical analysis of the concept of Creating Shared Value CSV In the theoretical analysis the author assesses the uniqueness of the theory of Creating Shared Value by comparing it to other relevant social responsibility concepts The empirical analysis provides insights from over 60 industry case studies of Creating Shared Value The assessment includes the influence of geography as well as a range of other relevant external and internal factors As a result the author identifies critical success factors for the creation of shared value **Breaking up the Global Value Chain** Torben Pedersen,Timothy M. Devinney,Laszlo Tihanyi,Arnaldo Camuffo,2017-08-18 Recent developments are challenging the traditional separation between advanced and emerging

economies as host of knowledge and production intensive activities respectively Authors assess whether the co location of R D and manufacturing is critical for development and innovation
