Why a quantitative approach might be used in the decision-making process:

1. Complex problems and the manager cannot develop a good solution without the aid of quantitative analysis.
2. Many important problems (e.g., a great deal of money is involved), and the manager desires a thorough analysis before attempting to make a decision.
3. Other problems and the manager has not previous experience from which to draw.
4. Repetitive problems and the manager saves time and effort by relying on procedures previously developed for similar decisions.
