It is the responsibility of the owner of the construction and industrial equipment products to be knowledgeable about federal, state and local regulations that affect the total usage of the equipment, and responsibility to working personnel and the public. Since regulations are subject to change, and also differ from one local to another, this manual makes no attempt to provide such information.

Terex Cranes provides appropriate operation and maintenance manuals for various construction and industrial equipment products that it manufactures and sells. In addition, where applicable, appropriate national consensus standards, industry standards and safety related manuals are included with the Terex manuals in the shipment of each product. It is company policy to provide the information for the owner or user of the equipment. It is expected that the owner or user will utilize these manuals and standards to provide the appropriate information and training to those people who are to operate, maintain and supervise the use of equipment in a proper and safe manner.

Construction and industrial equipment is designed and manufactured to perform repeatedly work. Under normal usage, the equipment will wear. For this reason, it is

essential that the personnel evaluate and perform a periodic inspection of the equipment. The objective of inspection programs is to prevent accidents, reduce downtime, and keep the equipment working efficiently. These inspection programs should be designed to discover worn, cracked, broken or deteriorated parts and loose or missing fasteners before they result in a problem.

Proper training and inspection programs are essential to avoiding injury to persons, damage to property and excessive maintenance costs.

Read and understand the manuals provided with the equipment. Assistance is available from the salesperson of your Terex product and from the Terex manufacturing facility.
