Parallel and Distributed Processing Techniques Hamid R. Arabnia, Masami Takata, Leonidas Deligiannidis, Pablo Rivas, Masahito Ohue, Nobuaki Yasuo, 2025-03-25 This book constitutes the proceedings of the 30th International Conference on Parallel and Distributed Processing Techniques PDPTA 2024 held as part of the 2024 World Congress in Computer Science Computer Engineering and Applied Computing in Las Vegas USA during July 22 to July 25 2024 The 24 papers included in this book were carefully reviewed and selected from 143 submissions They have been organized in topical sections as follows Parallel and distributed processing techniques and applications and HPC and Workshop on Mathematical Modeling and Problem Solving

Modeling, Control, and Optimization of Natural Gas Processing Plants William A. Poe, Saeid Mokhatab, 2016-09-09 Modeling Control and Optimization of Natural Gas Processing Plants presents the latest on the evolution of the natural gas industry shining a light on the unique challenges plant managers and owners face when looking for ways to optimize plant performance and efficiency including topics such as the various feed gas compositions temperatures pressures and throughput capacities that keep them looking for better decision support tools The book delivers the first reference focused strictly on the fast growing natural gas markets Whether you are trying to magnify your plants existing capabilities or are designing a new facility to handle more feedstock options this reference guides you by combining modeling control and optimization strategies with the latest developments within the natural gas industry including the very latest in algorithms software and real world case studies Helps users adapt their natural gas plant quickly with optimization strategies and advanced control methods Presents real world application for gas process operations with software and algorithm comparisons and practical case studies Provides coverage on multivariable control and optimization on existing equipment Allows plant managers and owners the tools they need to maximize the value of the natural gas produced

Artificial Intelligence Assisted Structural Optimization Adithya Challapalli, Guoqiang Li, 2025-02-27 Artificial Intelligence Assisted Structural Optimization explores the use of machine learning and correlation analysis within the forward design and inverse design frameworks to design and optimize lightweight load bearing structures as well as mechanical metamaterials Discussing both machine learning and design analysis in detail this book enables readers to optimize their designs using a data driven approach This book discusses the basics of the materials utilized for example shape memory polymers and the manufacturing approach employed such as 3D or 4D printing Additionally the book discusses the use of forward design and inverse design frameworks to discover novel lattice unit cells and thin walled cellular unit cells with enhanced mechanical and functional properties such as increased mechanical strength heightened natural frequency strengthened impact tolerance and improved recovery stress Inverse design methodologies using generative adversarial networks are proposed to further investigate and improve these structures Detailed discussions on fingerprinting approaches machine learning models structure screening techniques and typical Python codes are provided in the book The book provides detailed guidance for

both students and industry engineers to optimize their structural designs using machine learning **Supply Chain**
