"One of the most significant new features of Oracle E-Business Suite Release 12.2 is Online Patching, which greatly reduces the periods of downtime needed when applying patches. Such a significant transition does, however, require an understanding of the new patching model, including the new terminology and tools that underpin online patching operation, as well as the database and file system features and organization.

This Technical Planning Guide is designed to help you identify what you need to think about as you prepare to install (or upgrade to) Oracle E-Business Suite Release 12.2 and its online patching environment."
