their biomechanics while others take part in mental exercises designed to test their brain's psychological resilience. Meanwhile coaches like Michael Hebron purge golfers of all technical information tapping into the power of intuitive physical learning by playing rudimentary games. From historic St Andrews to manicured Augusta experimental communities in California to corporatized conferences in Orlando William James to Ben Hogan to theoretical physics the factions of the spiritual and technical push to redefine the boundaries of the game. And yet what does it say that Tiger Woods has orchestrated one of the greatest comebacks in sports history without the aid of a formal coach? But *Golf's Holy War* is more than just a book about golf it's a story about modern life and how we are torn between resisting and embracing the changes brought about by the advancements of science and technology. It's also an exploration of historical legacies the enriching bonds of education and the many interpretations of reality.
